

**VIVEKANANDHA COLLEGE OF ARTS AND SCIENCES FOR WOMEN  
(AUTONOMOUS)**

**M.Sc., (COMPUTER SCIENCE)  
(Candidates admitted from 2020-2021 Onwards)**

**REGULATIONS**

**I. SCOPE OF THE PROGRAMME**

Master of Computer Science can be considered to be one of the most prominent Master's level programs in our country. This program mainly deals with the development of computer applications for the purpose of updating computer programming languages. M.Sc. (CS) also aims at creating strong knowledge of theoretical computer science subjects who can be employed in research and development units of industries. The course has a time period of two years with four semesters.

**II. SALIENT FEATURES**

- Regular conduct of guest lectures and seminars
- Campus recruitment
- Provides facilities such as internet access and in-house library
- Provides career guidance for Post Graduate Courses and the Certifications in programming languages
- Conduct of personality development program
- Visiting faculties from industries

**III. OBJECTIVES OF THE COURSE**

The course objective of the M.Sc. Computer Science program is to provide advanced and in-depth knowledge of computer science and its applications to enable students pursue a professional career in Information and Communication Technology in related industry, business and research. The course designed to impart professional knowledge and practical skills to the students.

**IV. ELIGIBILITY FOR ADMISSION**

A Candidate who has passed B.Sc. Computer Science /BCA/B.Sc. Computer Technology / B.Sc. Information Science Degree of Periyar university or any of the Degree of any other university accepted by the syndicate as equivalent thereto subject to such conditions as may be prescribed therefore shall be permitted to appear and qualified for the M.Sc. Computer Science Degree Examinations of the Periyar University after a course of study of two academic years.

## V. DURATION OF THE PROGRAMME

- The course shall extend over a period of two academic years consisting of four semesters. Each academic year will be divided into two semesters. The First semester will consist of the period from July to November and the Second semester from December to April.
- The subjects of the study shall be in accordance with the syllabus prescribed from time to time by the Board of Studies of Vivekanandha College of Arts and Sciences for Women (Autonomous) with the approval of Periyar University.

## VI. CONTINUOUS INTERNAL ASSESSMENT (CIA)

The performance of the students will be assessed continuously and the Internal Assessment Marks will be as under:

1. Average of two Tests -	10 Marks
2. Seminar -	05 Marks
3. Assignment -	05 Marks
4. Attendance -	05 Marks

---

Total	=	25 Marks
-------	---	----------

---

### Internal Assessment Marks for Practical

1. Attendance -	10 Marks
2. Observation -	10 Marks
3. Test -	20 Marks

---

Total	=	40 Marks
-------	---	----------

---

### **PASSING MINIMUM (Theory) - EXTERNAL**

In the Semester Examinations, the passing minimum shall be 50 % out of 75 Marks. (38 Marks)

### **PASSING MINIMUM (Practical) - EXTERNAL**

In the Semester Examinations, the passing minimum shall be 50 % out of 60 Marks. (30 Marks)

## Distribution of Marks

Program writing : 10 Marks

Debugging : 10 Marks

For Results : 05 Marks

Viva – voce :05 Marks

The Passing minimum shall be 50% out of 60 marks (30 Marks)

## VII. ELIGIBILITY FOR EXAMINATION

PERCENTAGE	MARKS	
	THEORY	PRACTICAL
75-80	1	2
81-85	2	4
86-90	3	6
91-95	4	8
96-100	5	10

A candidate will be permitted to appear for the Semester Examination only on earning 75 % of attendance and only when her conduct has been satisfactory. A candidate having 65% to 74% of attendance should pay condination fees prescribed by the controller of Examination office.

## VIII. CLASSIFICATION OF SUCCESSFUL CANDIDATES

Successful candidates passing the examination of Core Courses (main and allied subjects) and securing marks

- a) 75 % and above shall be declared to have passed the examination in first class with Distinction provided they pass all the examinations prescribed for the course at first appearance itself.
- b) 60% and above but below 75 % shall be declared to have passed the examinations in first class without Distinction.
- c) 50% and above but below 60% shall be declared to have passed the examinations in second class.

- d) Candidates who pass all the examinations prescribed for the course at the first appearance itself and within a period of two consecutive academic years from the year of admission only will be eligible for University rank.
- e) If she fails to complete her course within the specified period, she can extend for two year's to complete her course.

## **IX. ELIGIBILITY FOR AWARD OF THE DEGREE**

A candidate shall be eligible for the award of the degree only if she has undergone the above degree for a period of not less than two academic years comprising of four semesters and passed the examinations prescribed and fulfilled such conditions have been prescribed therefore.

## **X. PROCEDURE IN THE EVENT OF FAILURE**

If a candidate fails in a particular subject, she may reappear for the semester examination in the concerned subject in subsequent semesters and shall pass the examination.

## **XI. COMMENCEMENT OF THE REGULATIONS**

- The regulations shall take effect from the academic year 2018-19 (i.e.,) for the students who are to be admitted to the first year of the course during the academic year 2018-19 and thereafter.
- Candidates who were admitted to the PG course of study before 2018-19 shall be permitted to appear for the examinations under those regulations for the period of three years ie., upto and inclusive of the examinations of 2020-21. Thereafter, they will be permitted to appear for the examination only under the regulations then in force.

**EVALUATION OF EXTERNAL EXAMINATIONS (EE)****QUESTION PAPER PATTERN****External Evaluation (Theory)**

Knowledge Level	Section	Marks	Description	Total
K1 ,K2,K3,K4	A (Either or Pattern))	5 x 5=25 Marks	Short Answers	<b>75</b>
K1 ,K2,K3,K4	B( Either or Pattern)	5x 10= 50 Marks	Descriptive Type	

**Internal Evaluation (Theory)**

Knowledge Level	Section	Marks
K1 ,K2,K3,K4	CIA -1 and CIA -2	5
K1 ,K2,K3,K4	Model	10
K1 ,K2,K3,K4	Assignment	5
-	Attendance	5
Total		<b>25</b>

## QUESTION PAPER PATTERN – Practical

Time duration: 3 Hours

Max. Marks: 60

1. One compulsory question from the given list of programs : 30 Marks
2. One Either/OR type question from the given list of programs : 30 Marks

The Passing minimum shall be 50% out of 60 marks (30 marks )

### Distribution of Marks

Problem Understanding	: 05 Marks
Program writing	: 10 Marks
Debugging & Result	: 10 Marks
Viva voce	: 05 Marks

## QUESTION PAPER PATTERN – Project and Viva voce

Evaluation (External)	: 75 Marks
Viva-voce (External)	: 25 Marks

### Continuous Assessment Test (CIA 1 and CIA 2)

Knowledge Level	Section	Marks	Description	Total
<b>K1</b>	A (Answer All)	10 x1= 10 Marks	MCQ/define	<b>25</b>
<b>K2</b>	B( Either or Pattern)	1x 5= 5 Marks	Short Answers	
<b>K3</b>	C (Answer 4 out of 6)	1x 10= 5Marks	Descriptive	

**VIVEKANANDHA COLLEGE OF ARTS AND SCIENCE FOR WOMEN  
(AUTONOMOUS)**

**ELAYAMPALAYAM, TIRUCHENGODE, NAMAKKAL DT.**

**VISION**

To evolve into a center of excellence in higher education through creative and innovative practices to social equity for women.

**MISSION**

- To provide sufficient learning infrastructure to the students to pursue their studies.
- To provide good opportunity for higher education and favorable environment to the students to acquire education.
- To provide quality academic programs training activities and research facilities.
- To facilitate industry-institute interaction.

**PG DEPARTMENT OF COMPUTER SCIENCE**

**VISION**

To provide high academic goals to the students and make them the world leaders both in educational and research through effective teaching.

**MISSION**

- To create, share and apply knowledge in Computer Science including inter disciplinary areas that extends the scope of Computer Science and benefit humanity.
- To educate students to be successful, ethical and effective problem solvers.
- To prepare the students to contribute positively to the economic well being of our region and nation.

**M.Sc. – COMPUTER SCIENCE****COURSE PATTERN AND SCHEME OF EXAMINATIONS UNDER CBCS**  
Candidates admitted from the year 2020-2021 (Onwards)

### EDC-EXTRA DISCIPLINARY COURSE

Students are expected to opt EDC (Non major elective) offered by other departments.

I.A. – INTERNAL ASSESSMENT

E.E. – END SEMESTER EXAMINATIONS

The content of the syllabus and regulations may be followed for at least two sets of students from 2019-20 and it passed in the academic year 2020-2021.

**ELECTIVE COURSES****Elective-I:**

Course Code	Course Name
20P1CSE01	Theory of Computing
20P1CSE02	Software Project Management and Quality Assurance
20P1CSE03	Client Server Technology
20P1CSE04	Internet of Things

**Elective-II:**

Course Code	Course Name
20P2CSE05	Network Security
20P2CSE06	Wireless Application Protocol
20P2CSE07	Multimedia and Virtual Reality
20P2CSE08	AI and Expert System

**Elective-III:**

Course Code	Course Name
20P3CSE09	Compiler Design
20P3CSE10	Object Oriented Analysis and Design
20P3CSE11	Embedded Systems
20P3CSE12	Professional Ethics

**Elective-IV:**

Course Code	Course Name
20P4CSE13	Big Data Analytics
20P4CSE14	Cyber Forensics
20P4CSE15	Distributed Computing
20P4CSE16	Ad Hoc Sensor Network

<b>Subject Title</b>	<b>ADVANCED COMPUTER ORGANIZATION AND ARCHITECTURE</b>	<b>Semester</b>	<b>I</b>
<b>Subject Code</b>	<b>20P1CSC01</b>	<b>Specialization</b>	<b>NA</b>
<b>Type</b>	<b>Core: Theory</b>	<b>L:T:P:C</b>	<b>4:0:0:4</b>

Course objective:

1. To know Structure and functions of Computer architecture and organizations
2. Observe the characteristics of various computer memory concepts.
3. To understand the computer arithmetic and machine instructions.
4. Understand the parallel processing concepts.

<b>CO Number</b>	<b>CO Statement</b>	<b>Knowledge Level</b>
CO1	Recognize the operation of functional units of a computer and chip	K1
CO2	Compare the performance of different types of memory	K2,K4
CO3	Describe the computational operation of hardware units associated with a computing device	K3
CO4	Demonstrate the operation of processing unit	K4
CO5	Recognize the operation of parallel processing	K4

Subject Title	<b>ADVANCED COMPUTER ORGANIZATION AND ARCHITECTURE</b>	Semester	<b>I</b>
Subject Code	<b>20P1CSC01</b>	Specialization	<b>NA</b>
Type	<b>Core : Theory</b>	L:T:P:C	<b>4:0:0:4</b>
Unit	Contents	Levels	Number of Sessions
<b>I</b>	Introduction: Structure and Function-Computer Evaluation and Performance: History of computers- Designing for Performance: Microprocessor speed-performance balance-Improvement in chip organization and architecture. Computer Function and Interconnection: Computer Components-Computer Function: Instruction Fetch and Execute. Interconnection structures.	<b>K1</b>	<b>12</b>
<b>II</b>	Cache Memory: Characteristics of Memory Systems-Memory hierarchy-Cache memory principles- Elements of cache design: Cache size-Mapping function. Internal Memory: Semi-conductor main memory: Organization-DRAM & SRAM. External Memory: Magnetic Disk: read and write mechanism	<b>K2</b>	<b>12</b>
<b>III</b>	Computer Arithmetic: ALU-Integer Representation: Sign magnitude representation-Twos complement Representation-Fixed point Representation. Integer Arithmetic: Negation-Addition & Subtraction. Instruction Sets: Characteristics & Functions: Machine Instruction characteristics: Elements of Machine Instruction. Instruction Sets: Addressing Modes and Formats: Addressing: Immediate- Direct-Indirect-.	<b>K3</b>	<b>12</b>
<b>IV</b>	Processor structure & Function: Processor Organization- Register organization- Instruction cycle. Control Unit Operations: Micro Operations: The fetch cycle- The Indirect Cycle- The Interrupt cycle- The Execute Cycle- The instruction Cycle. Control of the Processor: Functional Requirements-Control Signals.	<b>K3,K4</b>	<b>12</b>
<b>V</b>	Parallel Processing: Multiple Processor Organizations: Types of parallel processor Systems- Parallel Organizations. Symmetric Multiprocessors: Organization-Multiprocessor Operating System Design considerations. Cache Coherence and the MESI Protocol: Software Solutions-Hardware Solutions-Snoopy Protocols-The MESI Protocol-Read Miss-Read Hit-Write Miss-Write Hit.	<b>K4</b>	<b>12</b>

<b>Subject Code</b>	<b>20P1CSC02</b>	<b>Specialization</b>	<b>NA</b>
<b>Type</b>	<b>Core: Theory</b>	<b>L:T:P:C</b>	<b>4:0:0:4</b>

1. To know the Fundamentals of the Analysis of Algorithm Efficiency
2. Understand the divide and conquer methodology.
3. Analysis search and boundary algorithm

### **Programme Specific Outcomes**

PS01: Analyze the efficiency of algorithms using time and space complexity theory

PS02: Have the mathematical foundation in analysis of algorithms

PS03: Understand different algorithmic design strategies

PS04: Apply design principles and concepts to algorithm design

<b>CO Number</b>	<b>CO Statement</b>	<b>Knowledge Level</b>
CO1	Summarize the relevance of algorithms for computational problems	K1
CO2	Differentiate different algorithmic approaches, techniques and methods.	K2
CO3	Apply optimization techniques for improving the efficiency of algorithms.	K3
CO4	<i>Analyze</i> each and every algorithm techniques	K4
CO5	Analyze a given algorithm for its efficiency based on time and space it occupies.	K4

<b>Subject Code</b>	<b>20P1CSC03</b>	<b>Specialization</b>	<b>NA</b>
<b>Type</b>	<b>Core: Theory</b>	<b>L:T:P:C</b>	<b>4:0:0:4</b>

**OBJECTIVE :**

1. identify the basics of internet.
2. understand the role of web browsers and web servers.
3. Practiced client side programming
4. Practiced server side programming and web services

**COURSE OUTCOME**

On the successful completion of the course the student will be able to develop Web pages for several purposes.

<b>CO Number</b>	<b>CO Statement</b>	<b>Knowledge Level</b>
CO1	<i>Recognize</i> Basics of internet and the significance of Web Technology.	K1
CO2	<i>Express</i> the knowledge on Javascript, JSP and ASP.	K2
CO3	<i>Employ</i> the understanding of the Client and Server side scripts and actively <i>participate</i> in teams for the creation of static and dynamic web pages.	K3
CO4	<i>Utilize</i> the web designing tools effectively in the real world applications.	K4
CO5	<i>Design</i> and <i>Establish</i> the Website or Web based Software.	K4

**Programme Specific Outcomes**

- PS01: know the essential basics of internet.
- PS02: Have the ability to utilize web browsers features.
- PS03: Understand the logic of java script programming.
- PS04: Apply JSP and ASP concept to develop web pages.

Subject Title	WEB TECHNOLOGIES	Semester	I
Subject Code	20P1CSC03	Specialization	NA

<b>Subject Code</b>	<b>20P1CSC04</b>	<b>Specialization</b>	<b>NA</b>
<b>Type</b>	<b>Core: Theory</b>	<b>L:T:P:C</b>	<b>4:0:0:4</b>

**Objective:**

1. To know the basics of Data base management system
2. To understand advanced and object oriented database concepts.
3. Analyze the principles of web and mobile databases.

**COURSE OUTCOME**

On the successful completion of the course the student will be able to

<b>CO Number</b>	<b>CO Statement</b>	<b>Knowledge Level</b>
CO1	Summarize the basics of advance data modeling and Advance SQL	K1
CO2	Differentiate different Database concepts and Concurrency Control.	K2
CO3	Apply various databases and data models in the different kind	K3
CO4	Analyze each and every databases and database systems	K4
CO5	Analyze different information systems and multimedia and spatial databases	K4

**Programme Specific Outcomes**

- PS01: Use of Advanced data models and Advanced SQL Functions and Procedures.
- PS02: Have the advance foundation in database concepts and concurrency control of database management systems
- PS03: Understand different object oriented databases and its characteristics
- PS04: Apply design principles and database concepts in web and mobile services.

<b>Subject Title</b>	<b>ADVANCED DATABASE MANAGEMENT SYSTEMS</b>	<b>Semester</b>	<b>I</b>

<b>2020-2021 Onwards</b>	<b>DESIGN AND ANALYSIS OF ALGORITHM LAB</b>	<b>M.Sc. Computer Science</b>
<b>I Semester</b>	<b>20P1CSP01</b>	<b>Core: Practical – I</b>
<b>Hours: 60</b>	<b>Practical -I</b>	<b>Credit : 2</b>

**COURSE OBJECTIVE**

- To implement the fundamental concepts of sorting , merging, backtracking and branch and bound algorithms using C++ Programming
- To implement real time problem using C++ Programming

**COURSE OUTCOME**

On the successful completion of the course the student will be able to

<b>CO Number</b>	<b>CO Statement</b>
<b>CO1</b>	Demonstrate algorithms using divide and conquer approach
<b>CO2</b>	Solve problems using greedy method.
<b>CO3</b>	Employ dynamic programming techniques.
<b>CO4</b>	Problem solving Using backtracking techniques
<b>CO5</b>	Problem solving Using Branch and Bound techniques

**LAB EXERCISE LIST**

1. Apply the Divide and Conquer technique to arrange a set of numbers using Merge Sort method.
2. Perform Strassen’s matrix multiplication using Divide and Conquer method.
3. Solve the Knapsack problem using Dynamic Programming.
2. Construct a Minimum Spanning Tree using Greedy method.
3. Perform Warshall’s Algorithm using Dynamic Programming.
4. Solve Dijkstra’s Algorithm using Greedy Technique.
5. Solve Subset Sum problem using Backtracking
6. Implement the 8-Queens Problem using Backtracking.
7. Implement Knapsack Problem using Backtracking.
8. Find the solution of Traveling Salesperson Problem using Branch and Bound technique.

<b>2020-2021 Onwards</b>	<b>WEB TECHNOLOGIES LAB</b>	<b>M.Sc. Computer Science</b>
<b>I Semester</b>	<b>20P1CSP02</b>	<b>Core: Practical – II</b>
<b>Hours: 60</b>	<b>Practical -II</b>	<b>Credit : 2</b>

On the successful completion of the course the student will be able to develop various kind of web pages.

<b>CO Number</b>	<b>CO Statement</b>
CO1	Demonstrate basic skill needed for surfing internet.
CO2	Develop HTML coding for web features.
CO3	Employ java script programming techniques.
CO4	Program coding using ASP, JSP for authentication and commercial purpose.
CO5	Web page designing for database connection with application.

### **Programme Specific Outcomes**

PS01: know the essential skill for developing simple web page.

PS02: Have the ability to design static web pages.

PS03: implement the programming principles of java script.

PS04: Apply JSP and ASP concept to develop dynamic web pages.

<b>2020-2021 Onwards</b>	<b>WEB TECHNOLOGIES LAB</b>	<b>M.Sc. Computer Science</b>
<b>I Semester</b>	<b>20P1CSP02</b>	<b>Core: Practical – II</b>
<b>Hours: 60</b>	<b>Practical -II</b>	<b>Credit : 2</b>

### **COURSE OBJECTIVE**

- To familiar the students to the effective use of web pages.
- To implement web page development using java script, JSP and ASP.

### **Web technologies Practical Listing:**

1. Write a XML program for job listing in HTML
2. Write a JavaScript code block, which checks the contents entered in a form's text element. If the text entered is in the lower case, convert to upper case
3. Write a JavaScript code block, which validates a username and password
  - a) If either the name or password field is not entered display an error message
  - b) The fields are entered do not match with default values display an error message
  - c) If the fields entered match, display the welcome message
4. Write a JavaScript code to display the current date and time in a browser
5. Write a JSP Program for user authentication
6. Write a JSP Program for a simple shopping cart
7. Write a JSP Program to prepare a bio data and store it in database
8. Write an ASP Program using Response and Request Object
9. Write an ASP Program using Ad Rotator Component
10. Write an ASP program using database connectivity for student's record

<b>Subject Title</b>	<b>ADVANCED CONCEPTS IN OPERATING SYSTEMS</b>	<b>Semester</b>	<b>II</b>
<b>Subject Code</b>	<b>20P2CSC05</b>	<b>Specialization</b>	<b>NA</b>
<b>Type</b>	<b>Core: Theory</b>	<b>L:T:P:C</b>	<b>4:0:0:4</b>

### COURSE OBJECTIVES

On successful completion of this course we learn the fundamentals of Operating Systems architecture, Algorithms for Implementing DSM components and management aspects of Real time and Mobile operating Systems.

### COURSE OUTCOMES

<b>CO Number</b>	<b>CO Statement</b>	<b>Knowledge Level</b>
<b>C01</b>	Understand the concepts of Operating System	<b>K1</b>
<b>C02</b>	To learn about DSM	<b>K2</b>
<b>C03</b>	To analyze the basics of Operating System Algorithms	<b>K4</b>
<b>C04</b>	To implement distributed database operating system in various places	<b>K3</b>
<b>C05</b>	Design and Establish the Operating system to apply in various places	<b>K4</b>

<b>Subject Title</b>	<b>ADVANCED CONCEPTS IN OPERATING SYSTEMS</b>	<b>Semester</b>	<b>II</b>
<b>Subject Code</b>	<b>20P2CSC05</b>	<b>Specialization</b>	<b>NA</b>
<b>Type</b>	<b>Core: Theory</b>	<b>L:T:P:C</b>	<b>4:0:0:4</b>

<b>Unit</b>	<b>Syllabus Contents</b>	<b>Levels</b>	<b>Number of Sessions</b>
<b>I</b>	Overview: Introduction- Functions of operating systems – Design Approaches – Types of Advanced Operating Systems. Synchronization Mechanisms: Introduction – Concept of Process – Concurrent Process – The critical section Problem. Process Deadlocks: Introduction – Preliminaries – Models of Deadlocks – Models of Resources – A Graph-Theoretic Model of a System State – Necessary and Sufficient Conditions for a Deadlock.	<b>K1,K2</b>	<b>12</b>
<b>II</b>	Architectures of Distributed Systems: Introduction – Motivation – System Architecture Types – Distributed operating Systems – Issues in Distributed operating System – Communication Network – Communication Primitives. Distributed Shared Memory: Introduction – Architecture and Motivation – Algorithms for Implementing DSM – Memory Coherence – Coherence Protocols – Design Issues.	<b>K2</b>	<b>12</b>
<b>III</b>	Multiprocessor System Architectures: Introduction – Motivations – Basic Multiprocessor System Architecture – Interconnection networks for Multiprocessor System – Caching – Hypercube Architecture. Multiprocessor Operating Systems: Introduction – Structures – Operating System Design Issues – Threads – Process Synchronization – Process Scheduling – Memory Management – Reliability/Fault Tolerance.	<b>K2,K3</b>	<b>12</b>
<b>IV</b>	Database Operating Systems: Introduction – Concurrency Control: Database Systems – Serializability Theory – Distributed database systems – Lock based and Timestamp based algorithm – Concurrency control algorithms.	<b>K2,K3</b>	<b>12</b>
<b>V</b>	CASE STUDY: Linux History- Design Principles-Kernel Modules- Process Management -Scheduling - Memory Management - File Systems- Input and Output - Interprocess Communication -Network Structure- Security	<b>K1,K2, K3,K4</b>	<b>12</b>

<b>Subject Code</b>	<b>20P2CSC06</b>	<b>Specialization</b>	<b>NA</b>
<b>Type</b>	<b>Core: Theory</b>	<b>L:T:P:C</b>	<b>4:0:0:4</b>

Objectives:

1. To understand AWT Controls and JDBC
2. To Know About Java Server Pages And Java Servlet
3. Create client and server side applications
4. Apply EJP concept.
5. Implement Hibernate and spring.

On successful completion of this course we learn the following concepts

### COURSE OUTCOMES

<b>CO Number</b>	<b>CO Statement</b>	<b>Knowledge Level</b>
<b>C01</b>	Understand the .concepts of java JSP,RMI,Servers,Servlets and Hibernet.	<b>K1</b>
<b>C02</b>	To know about Advance concept In EJB.	<b>K2</b>
<b>C03</b>	To analyze the concepts of RMI.	<b>K4</b>
<b>C04</b>	To apply RMI concepts in various networks.	<b>K3</b>
<b>C05</b>	To Design and Establish the server pages with client interaction.	<b>K4</b>

<b>Subject Title</b>	<b>JAVA SERVER PROGRAMMING</b>	<b>Semester</b>	<b>II</b>
<b>Subject Code</b>	<b>20P2CSC06</b>	<b>Specialization</b>	<b>NA</b>
<b>Type</b>	<b>Core: Theory</b>	<b>L:T:P:C</b>	<b>4:0:0:4</b>

<b>Unit</b>	<b>Syllabus Contents</b>	<b>Levels</b>	<b>Number of Sessions</b>
<b>I</b>	AWT: Using AWT Controls, Layout Managers and Menus. SWING: A Tour of SWING – Event Handling-Java Database Connectivity (JDBC).	<b>K1,K2</b>	<b>12</b>
<b>II</b>	Java Servlets: Life cycle of Servlet - constituents of javax.servlet.package Constituents of javax.servlet.http.package-Cookies- Session Tracking. Java Server Pages: Introducing Java Server Pages-Basic Elements–Actions Elements-Implicit Objects.	<b>K2</b>	<b>12</b>
<b>III</b>	Remote method Invocation: Remote Interface-java.rmi.server package- The Naming Class - RMI Security Manager Class -RMI Exceptions - Steps involved in creating RMI Client and Server Classes. Java Bean: Advantages of Java Bean –Application Builder Tools-JAR files- Introspection - Developing a Simple Java Bean using JDK- Persistence – Customizers - Java Mail.	<b>K2,K3</b>	<b>12</b>
<b>IV</b>	Understanding EJB: EJB Architecture-Session Bean-Developing Session Beans-Entity Beans - Bean managed persistence in Entity Beans. Understanding Struts: Introduction-MVC Framework- Struts Control flow - Building Model Components - Building View Components – Building Control Components.	<b>K3</b>	<b>12</b>
<b>V</b>	Hibernate: Features of Hibernate-Hibernate Architecture – Understanding Hibernate O/R Mapping - Hibernate Query Language. Spring: Introduction to the Spring Framework - Features of the Spring-Spring Architecture-Spring AOP-Testing-Data Access using JDBC.	<b>K1,K2, K3,K4</b>	<b>12</b>

<b>Subject Title</b>	<b>PYTHON PROGRAMMING</b>	<b>Semester</b>	<b>III</b>
<b>Subject Code</b>	<b>20P3CSC10</b>	<b>Specialization</b>	<b>NA</b>
<b>Type</b>	<b>Core : Theory</b>	<b>L:T:P:C</b>	<b>4:0:0:4</b>

Objective:

1. Analyze the efficiency of algorithmic problem solving Techniques.
2. Acquire the mathematical foundation in analysis of algorithms
3. Understand different control logic in design strategies
4. Apply design principles and concepts to write source code for specific codings

### **COURSE OUTCOME**

On the successful completion of the course the student will be able to

<b>CO Number</b>	<b>CO Statement</b>	<b>Knowledge Level</b>
CO1	Recognize the operation of algorithmic problem solving Technique.	K1
CO2	Identify and handle basic tokens of python programs and practice to write small coding in python.	K2
CO3	Describe the computational operation of conditionals , function and string modules.	K3
CO4	Demonstrate the operation list and advanced list operations and applications.	K4
CO5	Recognize the operation of files and exceptions and illustrative programs.	K4

<b>Subject Title</b>	<b>PYTHON PROGRAMMING</b>	<b>Semester</b>	<b>III</b>
<b>Subject Code</b>	<b>20P3CSC10</b>	<b>Specialization</b>	<b>NA</b>
<b>Type</b>	<b>Core : Theory</b>	<b>L:T:P:C</b>	<b>4:0:0:4</b>

<b>Unit</b>	<b>Syllabus Contents</b>	<b>Levels</b>	<b>Number of Sessions</b>
I	Python: Introduction – Python interpreter and interactive mode – Values & Types – Variable – Expressions and Statements – Assigning Values in Python, Variable Declaration, Multiple Assignment – Operators – Types of Operators, Operator Precedence – Modules and Functions: Modules, Function Definition and Use, Defining a Function, Calling Function, Uses of Function, Advantages of Functions - Flow of Execution.	K1	12
II	Parameters and Arguments: Functions with No Arguments, Functions with Arguments, Functions with Return Value. Conditionals: Booleans Values and Operators – Operators – Operator Precedence – Decision Making – if, if... Else, If...Elif... Else & Nested statements – Iteration – Fruitful Functions – Scope of Variable – Global and Local Variable in Function, Nonlocal Variable – Composition – Recursion.	K1 K2	12
III	Strings: String Slices – String are Immutable – String Functions and Methods – String Module – Lists as Array. Lists: Accessing Elements in Lists Using Subscript Operator, List Operations, List Slices, List Methods, List Loop, Mutability, Aliasing, Cloning Lists, List Parameters, Deleting List Elements, Python Functions for List Operations, List Comprehension.	K2 K3	12
IV	Tuples: Advantages of Tuple Over List, Accessing Values, Updating Tuples, Delete Tuple Elements, Tuple Assignment, Tuple Methods, Other Tuple Operations, Tuples As Return Values, Built-in Functions with Tuple, Variable Length Arguments Tuples – Dictionaries: Built-in Dictionary Functions and Methods, Access update and Add Elements, Delete and Remove Elements, Sorting, Iterating through, Reverse Lookup, Inverting a Dictionary,	K4	12

	Memorization(Memos)		
V	Files: Reading and Writing, Format Operator, Command Line Arguments – Errors and Exceptions: Errors, Exceptions. Modules: Writing Modules, Locating Modules. Packages: Steps to create a Python Package.	K5	12

CO2	S	M	M	S
CO3	S	L	L	M
CO4	M	S	M	S
CO5	S	L	S	S

S- Strong, M- Medium, L – Low

<b>Subject Title</b>	<b>Data Mining And Warehousing</b>	<b>Semester</b>	<b>III</b>
<b>Subject Code</b>	<b>20P3CSC11</b>	<b>Specialization</b>	<b>NA</b>
<b>Type</b>	<b>Core : Theory</b>	<b>L:T:P:C</b>	<b>4:0:0:4</b>

**OBJECTIVE:**

- Learn the concepts of database technology.
- Understand the need for data mining and its applications.
- To examine the types of the data to be mined
- To present a general classification of tasks to integrate a data mining system.
- Apply preprocessing statistical methods for any given raw data.

**COURSE OUTCOME**

On the successful completion of the course the student will be able to

CO Number	CO Statement	Knowledge Level
CO1	Evaluate and implement a wide range of emerging and newly-adopted methodologies and technologies to facilitate the knowledge discovery	K2
CO2	Assess raw input data, and process it to provide suitable input for a range of data mining algorithms	K2
CO3	Discover and measure interesting patterns from different kinds of databases	K3
CO4	Characterize and discriminate data summarization forms and determine data mining functionalities	K4
CO5	Design and implement of a data-mining application using sample, realistic data sets and modern tools	K2

<b>Subject Title</b>	<b>Data Mining and Warehousing</b>	<b>Semester</b>	<b>III</b>	
<b>Subject Code</b>	<b>20P3CSC11</b>	<b>Specialization</b>	<b>NA</b>	
<b>Type</b>	<b>Core : Theory</b>	<b>L:T:P:C</b>	<b>4:0:0:4</b>	
<b>Unit</b>	<b>Syllabus Contents</b>		<b>Levels</b>	<b>Number of Sessions</b>
<b>I</b>	Introduction: Data Mining – Data Mining Functionalities – Kinds of Patterns can be Mined – Classification – Data Mining Task Primitives - Major Issues. Data pre-processing: Descriptive Data Summarization - Data Cleaning – Data Integration and Transformation – Data Reduction – Data Discretization and concept Hierarchy Generation.		K2	<b>12</b>
<b>II</b>	Data warehouse and OLAP Technology: Data Warehouse – A Multidimensional Data Model – Data Warehouse Architecture – Data Warehouse Implementation – From data warehouse to data mining.		K2	<b>12</b>
<b>III</b>	Mining Frequent Patterns, Associations, and Correlations: Basic Concepts – Efficient and Scalable Frequent Itemset Mining Methods - Mining various kinds of Association Rules– From Association Mining to Correlation Analysis -. Constraint Based Association Mining. Classification and prediction: Issues regarding classification and prediction – Decision Tree Induction – Bayesian classification – Rule Based Classification - Classification by Back propagation – Prediction.		K3	<b>12</b>
<b>IV</b>	Cluster Analysis: Types of Data in Cluster Analysis - A categorization of Major Clustering Methods - Partitioning Methods - Hierarchical Methods – Density Based Methods - Grid Based Methods - Model Based Clustering Methods – Outlier Analysis - Mining Time-Series Data – Mining Sequence Patterns in Biological Data.		K4	<b>12</b>
<b>V</b>	Spatial Data Mining - Multimedia Data Mining – Text Mining -Mining the World Wide Web. Applications and Trends in Data Mining: Applications – Data Mining System Products and Research Prototypes – Additional Themes on Data Mining – Social Impacts of Data Mining – Trends in Data mining.		K2	<b>12</b>

<b>I Semester</b>	<b>20P1CSP01</b>	<b>Core: Practical – I</b>
<b>Hours: 60</b>	<b>Practical -I</b>	<b>Credit : 2</b>

**List of Programs:**

1. To compute the GCD of Two Numbers.
2. Find square root of a Number.
3. To find the exponentiation of a given positive Number.
4. To perform Linear search from the list of Elements.
5. List the first N prime Numbers.
6. Find the Maximum of a list of Numbers.
7. Implementation Insertion Sort.
8. Remove all the duplicate elements in a list.
9. Implement a program that take command line Arguments.
10. Implement a python program find the most frequent words in a text read from a file.
11. Simulate bouncing ball using Pygame

### Objectives

- To develop the program in WEKA to get knowledge on data mining concepts
- To familiarize with R programming to implement the process.
- Implement real world problems

### COURSE OUTCOME

CO Number	CO Statement	Knowledge Level
CO1	Know the primitive functions of numerical operations	K1
CO2	Understand the matrix operations	K2
CO3	Implement various statistical operations with R script.	K3
CO4	Perform K-Means clustering operations	K4
CO5	Implement real world problems.	K4

<b>Subject Title</b>	<b>Data Mining Lab</b>	<b>Semester</b>	<b>III</b>
<b>Subject Code</b>	<b>20P3CSP04</b>	<b>Specialization</b>	<b>NA</b>

**Lab Exercise List :**

1. To get the input from user and perform numerical operations (MAX, MIN, AVG, SUM, SQRT, ROUND).
2. To perform data import/export (.CSV, .XLS, .TXT) operations using data frames.
3. To get the input matrix from user and perform Matrix addition, subtraction, multiplication, inverse transpose and division operations using vector concept.
4. To perform statistical operations (Mean, Median, Mode and Standard deviation).
5. To perform data pre-processing operations i) Handling Missing data ii) Min-Max normalization
6. To perform dimensionality reduction operation using PCA.
7. To perform Simple Linear Regression and Multi Linear Regression.
8. To perform K-Means clustering operation and visualize it.
9. Write R script to diagnose any disease using KNN classification.
10. To perform market basket analysis using Apriori algorithm.

<b>Subject Code</b>	<b>20P1CSEO2</b>	<b>Specialization</b>	<b>NA</b>
<b>Type</b>	<b>Core : Theory</b>	<b>L:T:P:C</b>	<b>4:0:0:4</b>

### Objective

- Use of different Life cycle Model for software development
- Have the mathematical foundation in finding of project cost of algorithms
- Understand different algorithmic design strategies
- Apply design principles and concepts to reengineering and reverse engineering

### COURSE OUTCOME

On the successful completion of the course the student will be able to

<b>CO Number</b>	<b>CO Statement</b>	<b>Knowledge Level</b>
CO1	Summarize the relevance of software project management	K1
CO2	Differentiate different software configuration and tools	K2
CO3	Apply various software cost techniques in the different kind	K3
CO4	<i>Analyze</i> each and every algorithm techniques	K4
CO5	Analyze a given software for its efficiency based on the configuration	K4

<b>Subject Title</b>	<b>NETWORK SECURITY</b>	<b>Semester</b>	<b>II</b>
<b>Subject Code</b>	<b>20P2CSE05</b>	<b>Specialization</b>	<b>NA</b>
<b>Type</b>	<b>Elective –II : Theory</b>	<b>L:T:P:C</b>	<b>4:0:0:4</b>

**OBJECTIVE**

1. To learn about the Security architecture security types and security mechanisms.
2. To learn about the Network security has four objectives: confidentiality, integrity, availability, and non repudiation.
3. To gain the knowledge of Securing information is equivalent to ensuring that computers keep your secrets.
4. To Identify the function of a firewall, and how it keeps a computer secure and safe from viruses and plan for anti-virus protection.

**COURSE OUTCOME**

On the successful completion of the course the student will able to To study technologies and research problems in the Internet, security trends and pretty good policy in security related issues.

<b>CO Number</b>	<b>CO Statement</b>	<b>Knowledge Level</b>
CO1	To understand the concept of security and Encryption algorithms	K1
CO2	To analyze public key cryptography and Message Authentication algorithms	K1,K2
CO3	To Describe and learn about the Electronic mail Security concepts	K2,K3
CO4	To Demonstrate about the web security considerations	K4
CO5	To learn about the intruders and virus protections	K4

Subject Title	NETWORK SECURITY	Semester		II
Subject Code	20P2CSE05	Specialization		NA
Type	Elective –II : Theory	L:T:P:C		4:0:0:4
Unit	Syllabus Contents	Levels	Number of Sessions	
I	Introduction: Security Trends-The OSI Security Architecture - Security Attacks - Security Services- Security Mechanisms- Model for networkSecurity - Symmetric Encryption and Message Confidentiality: Symmetric Encryption Principles - Symmetric Block Encryption Algorithms - Stream Ciphers and RC4 - Cipher Block Modes of Operations - Location of Encryption Devices-Key Distribution.	K1	12	
II	Public Key Cryptography and Message Authentication: Approaches to Message Authentication – Secure Hash Functions and HMAC - Public Key Cryptography Principles - Public Key Cryptography Algorithms - Digital Signatures - Key Management. Authentication Applications: Kerberos - X.509 Authentication service - Public Key Infrastructures	K2,K3	12	
III	Electronic mail Security: Pretty Good Privacy (PGP) - S/MIME. IP Security: IP Security Overview – IP Security Architecture - Authentication Header - Encapsulating Security Payload - Combining security Associations .	K2,K3	12	
IV	Web Security: Web Security Considerations- Security Sockets Layer (SSL) and Transport Layer Security (TLS) - Secure Electronic Transaction. Network Management Security: Basic Concepts of SNMP - SNMPV1 Community facility - SNMPV3.	K4,K3	12	
V	Intruders: Intruders – Intrusion Detection – Password Management - Malicious Software: Viruses and Related Threats – Virus Countermeasures – Distributed Denial of Service Attacks. Firewalls: Firewall Design Principles – Trusted Systems – Common Criteria for IT Security Evaluation.	K4	12

**ELECTIVE-II.****AI AND EXPERT SYSTEMS****Credits: 4****Course Code: 20P2CSE08****Total Instructional Hours: 50****Learning objective:**

To enable the students to learn the concepts of Artificial Intelligence.

**UNIT- I 10 Hrs**

Introduction to artificial intelligences - semantic nets and description matching: semantic nets: good representation are the key to good problem solving-good representation support explicit, exposing description - a representation has four fundamental parts - the describe and match methods and analogy problem - the describe – and - match method and recognition of abstractions

**Self-Study:** Semantic Nets**UNIT- II 10 Hrs**

Generate and test, means - ends analysis, and problem reduction: the generate – and - test method - the means - ends analysis method – the problem - reduction method.

**Self-Study:** The Problem-Reduction Method**UNIT- III 10 Hrs**

Blind methods: net search is really tree search-search tress explode exponentially – depth - first search dives into the search tree – breadth - first search pushes uniformly into the search tree - the right search depends on the tree - nondeterministic search moves randomly into the search tree - heuristically informed methods: quality measurements turn depth - first search into hill climbing - foothills, plateaus, and ridges make hill hard to climb - beam search expands several partial paths and purges the rest – best - first search expands the best partial path-search may lead to discovery - search alternatives form a procedure family - nets and optimal search: the best path - redundant paths

**Self-Study:** The Rest-Best-First Search Expands the Best Partial Path**UNIT- IV 10 Hrs**

Trees and adversarial search: algorithmic methods-heuristic method-rules and rule chaining: rule-based deducting system - procedures for forward and backward chaining - rules, substrates, and cognitive modeling: rule - based system Viewed as substrate-rule-based system Viewed as models for human problem solving

**Self-Study:** Heuristic Method**UNIT- V 10 Hrs**

Fuzziness as Multivalence - Neurons as functions- signal Monotonicity - Biological Actions and signals – Common Signal Functions – Additive Neuronal Dynamics Learning as Encoding Change and quantization

37

**Self-Study:** Biological Actions and signal**Learning outcome:**

On successful completion of the course the students would get the problem and could solve the problems.

## ELECTIVE III

<b>Subject Title</b>	<b>COMPILER DESIGN</b>	<b>Semester</b>	<b>III</b>
<b>Subject Code</b>	<b>20P3CSE09</b>	<b>Specialization</b>	<b>NA</b>
<b>Type</b>	<b>Core - Theory</b>	<b>L:T:P:C</b>	<b>5:0:0:5</b>

**Objectives**

- To introduce the major concept areas of language translation and compiler design.
- To enrich the knowledge in various phases of compiler and its use,
- Understand code optimization techniques, code generation, and use of symbol table.
- To extend the knowledge of parser by parsing LL parser and LR parser.

On successful completion of this course the students do the following.

**COURSE OUTCOMES**

<b>CO Number</b>	<b>CO Statement</b>	<b>Knowledge Level</b>
<b>C01</b>	Understand the concepts of Compilers	<b>K1</b>
<b>C02</b>	To learn about context free grammars	<b>K2</b>
<b>C03</b>	To analyze the basics of syntax directed translations.	<b>K4</b>
<b>C04</b>	To implement lexical phase and syntactic phase concepts.	<b>K3</b>
<b>C05</b>	Design and Establish the compiler optimization process.	<b>K4</b>

<b>Subject Title</b>	<b>COMPILER DESIGN</b>	<b>Semester</b>	<b>III</b>
<b>Subject Code</b>	<b>20P3CSE09</b>	<b>Specialization</b>	<b>NA</b>
<b>Type</b>	<b>Core - Theory</b>	<b>L:T:P:C</b>	<b>5:0:0:5</b>
<b>Unit</b>	<b>Syllabus Contents</b>	<b>Levels</b>	<b>Number of Sessions</b>
<b>I</b>	Introduction to Compilers: Compilers and Translator – Need of Translator – The structure of a Compiler – Lexical analysis – Syntax analysis – Intermediate code generation – Optimization – Code generation – Compiler writing tools. Finite automata and lexical Analysis: The role of the lexical analysis – A simple approach to the design of lexical analyzers- Regular expressions to finite automata – Minimizing the number of states of a DFA.	<b>K1</b>	<b>12</b>
<b>II</b>	The Syntactic specification of programming languages: Context free grammars – Derivations and parse trees - Capabilities of context free grammars. Basic parsing techniques: Parsers – Shift reduce parsing – Operator precedence parsing – Top down parsing – Predictive parsers.	<b>K2</b>	<b>12</b>
<b>III</b>	Syntax directed translation: Intermediate code – Postfix notation – Parse trees and syntax trees – 3 address code – Quadruples and triples – Boolean expressions – Statements that alter the flow of control. Symbol tables: The contents of a symbol table – Data structures for symbol table – Representing scope	<b>K2,K3</b>	<b>12</b>
<b>IV</b>	Run time storage administration: Implementation of a simple stack allocation scheme – Implementation of block-structured languages. Error deduction and recovery: Errors – Lexical phase errors – Syntactic phase errors – Semantic errors.	<b>K4</b>	<b>12</b>
<b>V</b>	Introduction of code optimization: The principle sources of optimization – Loop optimization – The DAG representation of basic blocks – Global data flow analysis. Code generation: Object programs – Problems in code generation – A simple code generator – Register allocation and assignment – Code generation from DAG's – Peephole optimization.	<b>K4</b>	<b>12</b>

<b>Learning Resources</b>	
<b>Text Books</b>	1. Principles of Compiler Design by Alfred V.Aho, Jeffrey D.Ullman , Narosa Publications House.
<b>Reference Books</b>	1. Modern Compiler Design by David Galles, Fifth Edition 2012.

<b>Type</b>	<b>Core : Theory</b>	<b>L:T:P:C</b>	<b>4 : 0 : 0 : 4</b>

**Objective**

- To learn the basics of object oriented system development.
- To understand the OOD methodologies.
- Apply UML Language.
- Understand different design strategies in OOAD.
- Apply design principles and concepts to software designing.

**COURSE OUTCOME**

On the successful completion of the course the student will be able to

<b>CO Number</b>	<b>CO Statement</b>	<b>Knowledge Level</b>
CO1	Summarize the relevance of software project management	K1
CO2	Differentiate different software configuration and OOAD tools	K2
CO3	Apply UML language techniques.	K3
CO4	<i>Analyze</i> each and every design techniques	K4
CO5	Analyze a given software for its efficiency based on the object oriented design	K4

<b>Subject Title</b>	<b>OBJECT ORIENTED ANALYSIS AND DESIGN</b>	<b>Semester</b>	<b>III</b>
<b>Subject Code</b>	<b>20P3CSE10</b>	<b>Specialization</b>	<b>NA</b>

<b>Subject Title</b>	<b>Professional ethics</b>	<b>Semester</b>	<b>III</b>
<b>Subject Code</b>	<b>20P3CSE12</b>	<b>Specialization</b>	<b>NA</b>
<b>Type / Hours</b>	<b>Elective - Theory</b>	<b>L:T:P:C</b>	<b>4 : 0 : 0 : 4</b>

Course Objectives

- To provide the philosophical foundation of ethics.
- To provide Values based decision making and behavior
- To aid the students in professional code of ethics
- To understand how to apply them in their own work place.
- To provide resources assist them in appreciating universal human Values.

On successful completion of this course we can understand the following

**COURSE OUTCOMES**

<b>CO Number</b>	<b>CO Statement</b>	<b>Knowledge Level</b>
<b>C01</b>	Know the Nature and Scope of Business Ethics	<b>K1</b>
<b>C02</b>	Understanding Professional ethics	<b>K2</b>
<b>C03</b>	To analyze the basics of Corporate Social Responsibility	<b>K4</b>
<b>C04</b>	To apply Ethical values in india	<b>K3</b>
<b>C05</b>	Design and Establish the dimension of ethics..	<b>K4</b>

Subject Title	Professional ethics	Semester	III
Subject Code	20P3CSE12	Specialization	NA
Type / Hours	Elective / Theory/60 Hours	L:T:P:C	4 : 0 : 0 : 4
Unit	Syllabus Contents	Levels	Number of Sessions
I	<b>Nature and Scope of Business Ethics: Introduction</b> – Scope of Business Ethics - Religion and Ethics - Types of Ethics – Sources of Business Ethics - Factors Influencing Business Ethics – Importance of Business Ethics.	K1	12
II	<b>Professional Ethics: Introduction</b> – professional ethics – ethical problems faced by managers – new skill required for managers – managing ethical conduct in modern times.	K2	12
III	<b>Corporate Governance and CSR: Principles</b> of corporate governance – issues involved in corporate governance - theories of corporate governance – CSR – introduction – Various dimensions – argument for and against CSR..	K3	12
IV	<b>Ethics in India: Religious</b> foundations of ethics - Hinduism - Buddhism – Jainism - Ethical Values of Gandhi, Vivekananda, Aurobindo and Tagore.	K4	12
V	<b>Dimensions of Ethics :</b> Personal ethics - marketing ethics – technology ethics – environmental ethics	K5	12

<b>Type / Hours</b>	<b>Elective / Theory/60 Hours</b>	<b>L:T:P:C</b>	<b>4 : 0 : 0 : 4</b>

Objectives

- To understand the applications using Map Reduce Concepts.
- To learn to use various techniques for mining data stream.
- To understand the various search methods and visualization techniques.
- To learn to analyze the big data using intelligent techniques.

On successful completion of this course we can understand how to develop static and dynamic Web pages using ASP.NET.

**COURSE OUTCOMES**

<b>CO Number</b>	<b>CO Statement</b>	<b>Knowledge Level</b>
<b>C01</b>	Know the big data analytics concepts	<b>K1</b>
<b>C02</b>	Understanding mining streams.	<b>K2</b>
<b>C03</b>	To analyze the basics of HADOOP Fundamentals	<b>K4</b>
<b>C04</b>	To apply HIVE data processing operatopns.	<b>K3</b>
<b>C05</b>	Design and Establish the HADOOP Environment.	<b>K4</b>

Subject Title	Big Data Analytics	Semester	IV
Subject Code	20P4CSE13	Specialization	NA
Type / Hours	Elective / Theory/60 Hours	L:T:P:C	4 : 0 : 0 : 4
Unit	Syllabus Contents	Levels	Number of Sessions
I	<b>INTRODUCTION TO BIG DATA</b> Introduction to Big Data Platform – Challenges of Conventional Systems - Intelligent data analysis – Nature of Data - Analytic Processes and Tools - Analysis vs Reporting - Modern Data Analytic Tools - Statistical Concepts: Sampling Distributions - Re-Sampling - Statistical Inference - Prediction Error.	K1	12
II	<b>MINING DATA STREAMS</b> Introduction To Streams Concepts – Stream Data Model and Architecture - Stream Computing - Sampling Data in a Stream – Filtering Streams – Counting Distinct Elements in a Stream – Estimating Moments – Counting Oneness in a Window – Decaying Window - Real time Analytics Platform(RTAP) Applications - Case Studies - Real Time Sentiment Analysis, Stock Market Predictions.	K2	12
III	<b>HADOOP:</b> History of Hadoop- The Hadoop Distributed File System – Components of Hadoop- Analyzing the Data with Hadoop- Scaling Out- Hadoop Streaming- Design of HDFS-Java interfaces to HDFS- Basics-Developing a Map Reduce Application-How Map Reduce Works-Anatomy of a Map Reduce Job run-Failures-Job Scheduling-Shuffle and Sort – Task execution - Map Reduce Types and Formats- Map Reduce Features.	K3	12
IV	<b>HADOOP ENVIRONMENT:</b> Setting up a Hadoop Cluster - Cluster specification - Cluster Setup and Installation - Hadoop Configuration-Security in Hadoop - Administering Hadoop – HDFS - Monitoring-Maintenanc Hadoop benchmarks- Hadoop in the cloud.	K4	12
V	<b>FRAMEWORKS :</b> Applications on Big Data Using Pig and Hive – Data processing operators in Pig – Hive services – HiveQL – Querying Data in Hive - fundamentals of HBase and ZooKeeper - IBM InfoSphere BigInsights and Streams. Visualizations - Visual data analysis techniques, interaction techniques; Systems and applications.	K5	12

<b>Type / Hours</b>	<b>Elective - Theory</b>	<b>L:T:P:C</b>	<b>4 : 0 : 0 : 4</b>

**Objectives:**

- To study the protocols and the functionalities of ad hoc networks
- To understanding the various applications developed based on ad hoc networking,
- Identify and addressing issues and challenges created.
- To know about the challenges in establishing infrastructure.

**COURSE OUTCOMES**

On successful completion of this course the students do the following.

<b>CO Number</b>	<b>CO Statement</b>	<b>Knowledge Level</b>
<b>C01</b>	Understand the concepts of Adhoc networks	<b>K1</b>
<b>C02</b>	To learn about Routing protocols	<b>K2</b>
<b>C03</b>	To analyze the basics of secure routing protocols.	<b>K4</b>
<b>C04</b>	To compare sensor networks and networking sensors	<b>K3</b>
<b>C05</b>	Design and Establish the topology control in networks	<b>K4</b>

Subject Title	Adhoc Sensor Networks	Semester		IV	
Subject Code	20P4CSE16	Specialization		NA
