## DEPARTMENT OF ZOOLOGY

## M.Sc. DEGREE COURSE IN ZOOLOGY

SEMESTER-I (For those admitted in June 2018 and later) CORE PAPER - I

**TAXONOMY AND COMPARATIVE BIOLOGY OF  
INVERTEBRATE & VERTEBRATES - 18P1ZO01**

Contact hours per week - 05

Contact hours per semester: 75

4 CREDITS  
SYLLABUS**Course Objectives:**

- ❖ To acquire knowledge on the animal classification based on characters
- ❖ To study the fundamentals knowledge on feeding and locomotion of invertebrates
- ❖ To study the comparative anatomy of vertebrates and invertebrates

**UNIT I CLASSIFICATION**

Importance of taxonomy- Identification using taxonomic keys, General characteristics of animal phyla- Classification of animal phyla up to orders in invertebrates & Vertebrates

**UNIT I NOMENCLATURE**

Organization of coelom: Acoelomates, Pseudocoelomates and Coelomate groups. Zoological Nomenclature- Type: Holotype, Paratype, Lectotype, Syntype, Neotype and Allotype

**UNIT III LOCOMOTION & NUTRITION IN INVERTEBRATES**

Locomotion and adaptive mechanism of Invertebrates- flagellar- ciliary movement in protozoa, hydrostatic movement in Coelentrates, Annelida and Echinodermata. Nutrition and feeding mechanism in Invertebrates- Nutrition in Protozoa- Types and mode of feeding. Feeding diversity in Insects. Filter feeding mechanism in Metazoan- Crustaceans, Mollusca and Echinodermata.

**UNIT IV COMPARATIVE ANATOMY OF INVERTEBRATES**

Comparative study of the excretory systems, Nervous systems of invertebrates. Types of reproduction in Invertebrates

**UNIT V COMPARATIVE ANATOMY OF VERTEBRATES**

Comparative study on the structure and functions of alimentary canal and associated glands. Respiratory system of Fishes and Birds. Arterial and venous system of reptiles. Excretory system of reptiles and mammals; Nervous system: Brain of Amphibia and Mammals, Reproductive system of Reptiles and Mammals.

**REFERENCE BOOKS**

DEPARTMENT OF ZOOLOGY  
M.Sc. DEGREE COURSE IN ZOOLOGY

SEMESTER-I

CORE PAPER - II

**CELL AND MOLECULAR BIOLOGY – 18P1ZO02**

(For those admitted in June 2018 and later)

Contact hours per week: 05

Contact hours per semester: 75

4 CREDITS / SYLLABUS

**Course Objectives:**

- ❖ To study the structure and functional characters of biomolecules
- ❖ To understand the classification of biomolecules
- ❖ To gain knowledge on nucleic acids and enzymes
- ❖ To acquire knowledge about various biophysical techniques

**UNIT I: BASIC TECHNIQUE & INSTRUMENTATION (15 Hours)**

Microtome- Tissue Preparation, Sectioning, Mounting and Staining Techniques, Micrometry, Principles of Electron, Optical, and Phase contrast Microscope, SEM, TEM, X- Ray Diffraction Analysis.

**UNIT –II : CELL AND CELL SIGNALLING (15 Hours)**

Introduction of cell. Plasma membrane: Structure and modifications. Functions of plasma membrane. Cell signaling. Cell coat and cell recognition- functions of cell coat. Microtubules and microfilaments – structure, functions, role in cancer formation

**UNIT-III COMPONENTS OF CELLS (15 Hours)**

Endoplasmic reticulum – special functions of Rough Endoplasmic Reticulum and synthesis of exportable proteins. Golgi complex – Synthesis of sphingolipids, glycoproteins, secretory process in pancreas, insulin secretion and GERL region. Lysosome - cell digestive system – functions. Mitochondria – Structure and Function, Respiratory chain, Ribosome – prokaryotic and eukaryotic ribosomes.

**UNIT-IV CHROMOSOMES & CELL CYCLE (15 Hours)**

Chromosomes – Eu chromatin and Hetero chromatin chromosome, giant chromosome. DNA – Structure, Replication and DNA repair. RNA – types and their role in cellular activities. Cell division- Cell Cycle– Mitosis – Amitosis – Meiosis – Synaptonemal complex and significance. Cell aging.

**UNIT-V PROTEIN SYNTHESIS (15 Hours)**

Protein synthesis – Transcription in Prokaryotes and Eukaryotes. RNA processing – Capping, polyadenylation, introns, exons. Translation– initiation, elongation and termination of polypeptide chain synthesis.

<b>SL No</b>	<b>Course Outcome</b>	<b>Knowledge Level</b>
<b>CO1</b>	Understand the basic instrumentation process and its technique	<b>K1</b>
<b>CO2</b>	Compare the cell signaling process between the cells and cell organization	<b>K1</b>
<b>CO3</b>	Explain the ultra structure and functions of Cytoskeletons and Plasma membrane	<b>K2</b>
<b>CO4</b>	Assess the events of cell cycle, cell death and cancer	<b>K1 &amp; K2</b>
<b>CO5</b>	Illustrate the process of transcription and post transcriptional amendment in Eukaryotes	<b>K1</b>

VIVEKANANDHA COLLEGE OF ARTS AND SCIENCES FOR WOMEN  
(AUTONOMOUS)

DEPARTMENT OF ZOOLOGY/M.Sc. DEGREE COURSE IN ZOOLOGY  
SEMESTER-I CORE PAPER - III

**BIOCHEMISTRY AND BIOPHYSICS - 18P1ZO03**

(For those admitted in June 2018 and later)

Contact hours per week - 05

Contact hours per semester: 75

4 CREDITS/SYLLABUS

**Course Objectives:**

- ❖ To provide students with relevant knowledge and skills on instrumentation techniques
- ❖ To study principles and types of cell communication and adhesion
- ❖ To acquire advanced knowledge of molecular biology of prokaryotes, and eukaryotes.

**UNIT -I BIOCHEMICAL COMPOUNDS (15 Hours)**

Structure of Atoms, Molecules and chemical bonds, stabilizing interactions (Van der Waals, electrostatic, hydrogen bonding, hydrophobic interaction, Electrostatic Force). Biological Importance of Water, pH and Buffers.

**UNIT II BIOMOLECULES I (15 Hours)**

Carbohydrates - Classification, structure, function and properties. Metabolism of carbohydrates, TCA Cycle, Glycolysis, HMP Shunt.

Proteins–Classification, Structural organization of proteins (Primary, secondary, tertiary and quaternary structures). Amino acids- Definition, Classification and properties,

**UNIT -III BIOMOLECULES II (15 Hours)**

Lipids –Classification, structure, function and properties of simple and compound Lipids. Biological importance of sterols, cholesterol, Bile acids. Fatty acid Biosynthesis and Beta oxidation of fatty acids.

**UNIT -IV NUCLEIC ACIDS & ENZYMES (15 Hours)**

Nucleic acids: Composition and Properties of nucleic acids. Enzymes- Definition, Classification and functions of enzymes – Co-enzymes, Iso-enzymes, Allosteric enzymes, Abzymes – Bioenergetics, oxidative phosphorylation, coupled reaction, group transfer, biological energy transducers.

**UNIT – V: BIOPHYSICAL TECHNIQUES (15 Hours)**

Biophysics techniques -Separation Methods – Sedimentation – Chromatography methods. Spectroscopes. Introduction and applications of FTIR and Mass spectroscopy. Nuclear Magnetic Resonance (NMR); Radiation Bio physics – Introduction and medical applications.

<b>SL No</b>	<b>Course Outcome</b>	<b>Knowledge Level</b>
<b>CO1</b>	Classify the chemical bonds and forces interacting between molecules	<b>K1</b>
<b>CO2</b>	Summarize the structure, classification and- metabolic pathways of carbohydrates	<b>K1</b>
<b>CO3</b>	Understand the Structure, Classification and Metabolism of Proteins & Lipids.	<b>K2</b>
<b>CO4</b>	Illustrate the metabolic pathway of nucleic acid and enzymes.	<b>K1 &amp; K2</b>

VIVEKANANDHA COLLEGE OF ARTS AND SCIENCES FOR WOMEN  
(AUTONOMOUS)

DEPARTMENT OF ZOOLOGY/M.Sc. DEGREE COURSE IN ZOOLOGY

SEMESTER-I

CORE PAPER - IV

**MICROBIOLOGY AND IMMUNOLOGY- 18P1ZO04**

(For those admitted in June 2018 and later)

Contact hours per week: 05

Contact hours per semester: 75

4 CREDITS/ SYLLABUS

Course Objectives:

- ❖ Acquire knowledge on the culture, isolation and control of microorganisms
- ❖ Learn the food preservation techniques and study microbes in food and water
- ❖ Study the organs of immune system and the innate and adaptive immunity
- ❖ To gain knowledge on antigens, antibodies and their production mechanism
- ❖ To study the antigen antibody reactions and immunological disorders

Course outcomes:

- CO 1- Familiarize the culture techniques of microorganisms
- CO 2- Learn the food and water microbes and food preservation techniques
- CO 3- Techniques on development of monoclonal antibodies
- CO 4- Learn to understand the antigens and antibodies
- CO 5- Gain knowledge on the immunological disorders

**UNIT – I CULTURE OF MICROORGANISM**

Pure culture techniques- Isolation and Culture of Microbes and Staining Techniques. Microbial control: Physical agent: Moist heat, dry heat HEPA filter, chemical agent: Phenol, formaldehyde and alcohol.

**UNIT – II FOOD MICROBIOLOGY-**

Preservation of Food, Contamination, Food Borne diseases- Salmonella, Amoebiasis, Botulism and Aspergillus, Causes, Sources, Mode of Transmission, Symptoms and Control measures. Water Microbiology- Microbes in Water, Water borne diseases - Microbial analysis in potable water- SPC, MPN and membrane filter techniques. Methods of sewage treatment and disposal.

**UNIT - III IMMUNE SYSTEM**

Cells involved in the immune system, innate immunity- factors involved in innate immunity, active and passive acquired immunity. Lymphoid organs: Thymus, Bursa of Fabricius and bone marrow, lymph node, spleen, MALT, GALT, Payer's patches, Tonsils.

**UNIT IV HUMORAL IMMUNITY**

Primary and secondary immune response; Mechanism of antibody production, cell mediated immunity, MHC Classes and Structure. General Structure and Function of Immunoglobulin.

**UNIT – V HYPERSENSITIVITY**

Antigen- antibody reaction; immune complex, specificity, binding sites, binding forces, Bonus effect and cross reaction. Hypersensitivity: Factors, types and classification. Transplantation Immunology- Auto immune diseases – Myasthenia gravis, Pernicious anemia, Rheumatoid arthritis, Systemic lupus erythematosus (SLE), Vaccines- principles & types of vaccine - significance.

**REFERENCE BOOKS:**

DEPARTMENT OF ZOOLOGY  
M.Sc. DEGREE COURSE IN ZOOLOGY

SEMESTER-I

CORE PRACTICAL –I

**BIOCHEMISTRY, CELL AND MOLECULAR BIOLOGY, MICROBIOLOGY  
AND IMMUNOLOGY- 18P1ZOP01**

(For those admitted in June 2018 and later)

Contact hours per week: 05

Contact hours per semester: 70 Hours

4 CREDITS/ SYLLABUS

## I- Biochemistry

1. Quantitative estimation of Carbohydrate, Protein and Lipids
2. Estimation of Haemoglobin content in Blood, Differential count
3. Urine Analysis- Qualitative analysis of Sugar, Albumen and Ketone Bodies.

## II- Cell and Molecular Biology

3. Micrometry -measurement of cell size.
4. Study of mitotic cell divisions- Onion Root tip squash preparations.
5. Temporary squash preparation of salivary gland in Chironomous larva – Giant Chromosome.

## III- Microbiology

6. Simple staining and gram staining techniques.
9. Study of bacterial motility by hanging drop method.
10. Preparation of Media for Bacterial Culture
11. Bacterial Analysis of Milk- Methylene Blue reduction test

## IV. Immunology

12. Autoclaving, Electrophoresis techniques- Demo.
13. Demonstration of Antigen- Antibody reaction by interfacial ring test.

## Spotters

1. Colorimeter, pH Meter, Mitosis and Meiosis Stages, Entameoba, Salmonella Typhi, Bacillus sp.
2. Tour report of the visit to food preservation, food fermentation and dairy industries

## REFERENCE BOOKS:

SL No	Course Outcome	Knowledge Level
CO1	Quantify the Carbohydrate, Protein and Lipids from the given sample	K1
CO2	Explain the Micrometry -measurement of cell size.	K1
CO3	Analyze the staining technique for identification of microbes	K2
CO4	Demonstration of Antigen- Antibody reaction by interfacial ring test	K1 & K2

VIVEKANANDHA COLLEGE OF ARTS AND SCIENCES FOR WOMEN  
(AUTONOMOUS)

DEPARTMENT OF ZOOLOGY/M.Sc. DEGREE COURSE IN ZOOLOGY  
SEMESTER-I ELECTIVE – I

**ECONOMIC ZOOLOGY - 18P1ZOE01**

(For those admitted in June 2018 and later)

Contact hours per week: 05

Contact hours per semester: 75

4 CREDITS - SYLLABUS

**Course Objectives:**

- ❖ To study the economic importance of apiculture
- ❖ To study the importance of animal husbandries and aquaculture
- ❖ To know practices and economic importance of vermicast
- ❖ To learn recent developments in pharmaceuticals and animal health

**UNIT I: APICULTURE & LAC CULTURE**

Types of honey bees – Diseases and pests of bees – Harvesting and processing of honey – Types of Honey, Maintenance of Apiary, Instruments used in Apiculture.

Lac Culture : Types of Lac; Life cycle of Lac insect, Harvesting and Extraction of Lac; Uses and Enemies of Lac. Economic Importance

**UNIT II: POULTRY**

Types of birds for poultry – Bio-security measures followed in Poultry farms, Diseases and pests – Egg and meat production – Types of breeds rearing in animal husbandry (Cow, Sheep and Goats, Pigs) – Disease and parasites of animal husbandry. Economic importance.

**UNIT III: AQUACULTURE**

Aqua culture- Site selection and Construction, Pre stocking and post stocking management of Nursery, rearing and stocking ponds, Fish byproducts.

Prawn culture - Methods of prawn fishing, Preservation - Fish and Prawn, Marketing of Prawn.

**UNIT IV: VERMICULTURE**

Species of earthworm used in vermiculture- Raw materials for vermiculture- Compost Production. Natural enemies and their control measures-Harvesting of vermicompost and worms -Role of vermicompost in agriculture.

**UNIT V: PHARMACEUTICALS**

Sericulture – Types of Silk worms, Rearing techniques, Diseases – Bacterial, Fungal and Protozoan - their managements, reeling and Byproducts.

**REFERENCE BOOKS:**

<b>SL No</b>	<b>Course Outcome</b>	<b>Knowledge Level</b>
<b>CO1</b>	Elucidate the role of honey bee in diverse applications.	<b>K1</b>
<b>CO2</b>	Acquired knowledge about Poultry science	<b>K1</b>
<b>CO3</b>	Identify the economically important fishes and fishery products.	<b>K2</b>
<b>CO4</b>	Understand the earthworm as a friends of farmer	<b>K1 &amp; K2</b>
<b>CO5</b>	Illustrate the usage of Silkworm and its economic importance	

VIVEKANANDHA COLLEGE OF ARTS AND SCIENCES FOR WOMEN  
(AUTONOMOUS)  
DEPARTMENT OF ZOOLOGY  
M.Sc. DEGREE COURSE IN ZOOLOGY

SEMESTER-II

CORE PAPER –V

**DEVELOPMENTAL BIOLOGY – 18P2ZO05**  
(For those admitted in June 2018 and later)

Contact hours per week: 05

Contact hours per semester: 75

4 CREDITS  
SYLLABUS

Course Objectives:

- To understand the structure of gametes and the events of gametogenesis
- Acquire knowledge on the fertilization and morphogenetic movements in the developing embryo
- To understand organogenesis related to mechanisms of embryo development extra embryonic membrane and placenta in various animals.
- To learn the metamorphosis and regeneration
- To understand the embryonic organizer, inductions and differentiation.

Course outcomes:

CO1- Understand basic knowledge on gametogenesis

CO2- Learn the process of fertilization, organogenesis, differentiation, metamorphosis and regeneration in animals

UNIT– I: GAMETES (15 Hours)

Gametogenesis: Spermatogenesis- Types of Sperm, Ultra structure of Human sperm, Sperm motility and role of sperm in egg activation. Oogenesis- Types of Eggs and egg membranes, Ultra structure of Mammalian egg.

UNIT– II: FERTILIZATION & CLEAVAGE (15 Hours)

Fertilization– Process and significance – Post – fertilization changes. Parthenogenesis (Natural and Artificial). Cleavage – Chemical changes during cleavage – Pattern and plane of cleavage –Fate map.

UNIT – III: ORGANOGENESIS (15 Hours)

Morphogenetic movements – Nucleocytoplasmic interactions in morphogenesis – Gastrulation in Frog and Mammal- (animal name). Organogenesis – (Limb, heart, kidney and brain), Foetal membranes – Placenta – classification and physiology.

**UNIT – IV: METAMORPHOSIS & REGENERATION (15 Hours)**

Morphological and biological changes associated with metamorphosis – Hormonal control of amphibian metamorphosis – Neuro-endocrine control of insect metamorphosis. Regeneration –Types of regeneration -Experimental evidence for Regeneration.

**UNIT – V: DIFFERENTIATION (15 Hours)**

Embryonic fields and embryonic induction, Types of Differentiation – Genes in differentiation – Inductors and organizers.

**REFERENCE BOOKS:**

(For those admitted in June 2018 and later)

Contact hours per week: 05

Contact hours per semester: 75

4 CREDITS  
SYLLABUS

**Course Objectives:**

- To study the process of digestion, excretion and circulatory system,
- To acquire knowledge on the respiration and nervous system
- To understand the sense organs

**Course Outcomes:**

CO 1- To gain knowledge on digestive, respiratory and circulatory system

CO 2- Acquire knowledge on function of kidney and thermoregulation

CO 3-Basic functions of ear, eyes and main function of nervous system and muscles

**UNIT – I: DIGESTION (10 Hours)**

Introduction – Physiology of digestion - carbohydrates, proteins and lipids – Physiology of absorption and Assimilation. Balanced diet. Nutrition requirement for Pregnant women and Infant.

**UNIT – II RESPIRATION & CIRCULATION (15 Hours)**

Types of Respiration – Physiology of respiration and Excretion in Man – Respiratory pigments and their role in O<sub>2</sub> and CO<sub>2</sub> transport in animals.

Circulation: Types of hearts- Working Mechanism of Heart, Cardiac cycle, Electrocardiogram. Factors influencing circulation and coagulation of blood.

**UNIT – III EXCRETION (20 Hours)**

Nature and types of excretory products – Ammonotelism, Urotelism, Uricotelism, Patterns of excretion– Excretory organs- invertebrates and chordates – Physiology of excretion in Mammals – Regulation.

Thermoregulation- Homeotherms, Poikilotherms and Heterotherms, Aestivation and Hibernation.

**UNIT – IV NERVOUS & MUSCULAR (15 Hours)**

Types of neurons –Structure of typical nerve cell. Transmission of Nerve impulses  
Axonomic and Synaptic Transmission - Reflex action - Autonomic nervous system organization and functions.

Muscles and types, Ultra structure of skeletal muscles – Chemical composition – Mechanism of muscle contraction – Regulation and energetics of Muscle contraction.

#### UNIT – V SENSE ORGANS (15 Hours)

Chronobiology – Biological clock and Photoperiodism.

Physiology of Photoreceptor - mammalian eye. Physiology of Phonoreceptors- Mammalian ear.  
Physiology of Migration in fishes and birds.

M.Sc. DEGREE COURSE IN ZOOLOGY  
SEMESTER-II CORE PAPER –VII  
**ADVANCED GENETICS -18P2ZO07**

(For those admitted in June 2018 and later)

Contact hours per week: 05

Contact hours per semester: 75

4 CREDITS – SYLLABUS

Course Objectives:

- To understand fine structure of gene and their metabolic pathways
- Human karyotyping and chromosomal disorders
- To provide knowledge on the genetic makeup of microorganisms
- To get an overview on the gene interactions
- To study the application of genetics in animal breeding

Course outcomes:

CO 1- To understand the organization of genes and its metabolic pathways

CO 2- Learn the techniques involved in human karyotyping and the disorders in chromosomes

CO 3- To learn the microbial genetics and operon concept

CO 4- Acquire knowledge on Transgenic animals

UNIT – I: GENES & SYNDROMES (15 Hours)

Gene concept – fine structure of gene – one gene one polypeptide concept.

Human Genetics

Gene and metabolic pathways. Inborn errors of metabolism in man. Haemoglobin disorders – sickle cell anemia and thalassemia.

Human karyotype preparation and chromosomal syndromes in man – Down, Turner's and Klinefelter's syndromes.

UNIT – II: MICROBIAL GENETICS (20 Hours)

Evidence of genetics materials in Bacteria – genetic exchange and recombination in bacteria – conjugation, transformation and transduction. Viral genetics – bacteriophage.

Enzyme – regulatory mechanism – operon concept – GAL and LAC operon system – gene regulation in protein synthesis in prokaryotes and eukaryotes.

UNIT – III: COMPLEMENTARY GENES (10 Hours)

Multiple alleles and sex-linked gene. Gene Interactions. Genetics of races and species formation – genetic load – genetic polymorphism. Dosage compensation – X inactivation – genomic imprinting. Immunogenetics.

UNIT – IV: GENOMICS (15 Hours)

Chromosomal and point mutation, spontaneous and induced mutation, mutagens: physical, chemical and biological – genetic changes in Neoplasia in man.

UNIT – V: MUTATION (15 Hours)

Applied Genetics

Application of genetics in animal breeding – application of genetics in crime and law – DNA finger printing. Genetics basis of twins.

SL No	Course Outcome	Knowledge Level
CO1	Summarize the Human genetics characters	K1
CO2	Describe the evidence of genetics materials in microbes	K1
CO3	Discuss the mechanism of crossing over and linkage	K2
CO4	Explain the functional role of Chromosomal and point mutation	K1 & K2
CO5	Explain the functional role of applied genetics	

## VIVEKANANDHA COLLEGE OF ARTS AND SCIENCES FOR WOMEN

(AUTONOMOUS)

DEPARTMENT OF ZOOLOGY

M.Sc. DEGREE COURSE IN ZOOLOGY

SEMESTER-II

ELECTIVE –II

**MEDICAL LABORATORY TECHNIQUES -18P2ZOE02**

(For those admitted in June 2018 and later)

Contact hours per week: 05

Contact hours per semester: 75

4 CREDITS/ SYLLABUS

Course Objectives:

- To acquire knowledge on the laboratory safety issues and the precautionary methods for the waste disposal
- Diagnosis of blood, urine and microbial analysis under different pathological conditions
- To learn the techniques involved in molecular diagnosis

Course Outcomes:

CO1 -Learn the safety issues in laboratory conditions and acquire knowledge on the safety disposal of waste materials

CO2- To familiarize techniques for the analysis of blood, urine and microbes under disease conditions

CO3- Acquire knowledge on the use of RIA, ELISA, WESTERN BLOT, WIDEL TEST and DNA Finger Printing

UNIT – I LABORATORY & SAFETY (15 Hours)

The laboratory: Safety, Contaminants- Physical, Chemical, Biological Contaminants. – Universal work precautions (NWP) for laboratory personnel. Disposing of Biomedical waste.

UNIT – II HEMATOLOGICAL PARAMETERS (15 Hours)

Haemoglobin content, Differential Count, Haematocrit, packed cell volume, MCH, MCHC, MCV, Erythrocyte sedimentation rate, RBC fragility test, platelet count. Reticulocytocrit, haemorrhagic disorders, clotting time, Bleeding time, prothrombin time.

UNIT – III URINE TESTS (15 Hours)

Knowledge and skill in the study and analysis of urine. Physical parameter,- Colour, odor,  $p^H$ , Density. Chemical parameters – Sugar, Albumin, Ketone bodies and their clinical significances pregnancy tests.

UNIT – IV MICROBIAL PARAMETERS (15 Hours)

Microbial analysis of Blood, Urine, Faeces, Sputum. Parasitic analysis in Blood and Faeces, Analysis of semen, and cerebrospinal fluid for clinical investigation.

**UNIT – V MODERN ANALYSIS (15 Hours)**

Molecular diagnostic techniques – RIA, ELISA, WESTERN BLOT, WIDEL TEST and DNA finger printing.

SL No	Course Outcome	Knowledge Level
CO1	Interpret the observation of First Aid methods	K1
CO2	Identify the methods of quantification of Hemoglobin, Sedimentation rate	K1
CO3	Understand the method & collection of Urine	K2
CO4	Identify the microbial content in the human blood	K1 & K2
CO5	Understand the advanced analytical technique	

VIVEKANANDHA COLLEGE OF ARTS AND SCIENCES FOR WOMEN  
(AUTONOMOUS)DEPARTMENT OF ZOOLOGY  
M.Sc. DEGREE COURSE IN ZOOLOGY

SEMESTER-II

ELECTIVE –III

**FISHERY BIOLOGY - 18P2ZOE03**  
(For those admitted in June 2018 and later)

Contact hours per week: 05

Contact hours per semester: 75

4 CREDITS  
SYLLABUSCourse Objectives:

- To study the types of fish culture and the techniques involved in rearing
- To study the recent techniques of fish rearing under controlled conditions
- To learn recent trends in harvesting and marketing of fishes.
- To know the handling techniques of post-harvest technology and value added fish products
- To identify the parasitic diseases and nutritional disorders for the sustainable fish production

Course Outcomes:

- CO 1- Learn the fish culture techniques  
CO 2 –To acquire knowledge on fish farming and breeding techniques  
CO 3 –Gain more knowledge about fish byproducts and value added products  
CO 4 –Disease diagnosis and treatment techniques

UNIT I: TYPES OF FISH CULTURE (10 Hours)

Introduction – importance of fisheries. Aim of fish culture Qualities of culturable fishes.  
Types of fish culture – monoculture – composite culture- Integrated fish culture – paddy cum fish culture.

UNIT II: FARMING (15 Hours)

Construction and maintenance of fish farm – Type of fish ponds – Management of Fish culture – Breeding – Types of breeding- Induced breeding.

UNIT III: FISHING METHODS (15 Hours)

Harvesting – Methods of fishing – Electric fishing. Gears and Crafts, Transportation and marketing – Structure of a Fish market. Cooperative system – Fish copfed, Benfish, Sangams.

UNIT IV: BY PRODUCTS (20 Hours)

Fish handling, quality and processing. Preservation and processing methods, Fishery byproducts. Fish spoilage – Rigor mortis. Post-harvest technology.

UNIT V: DISEASE (15 Hours)

Fish diseases- Parasitic and Non- Parasitic diseases, Protozoan disease, and Nutritional disorder. Symptoms and Treatment methods.

CORE PRACTICAL –II

**DEVELOPMENTAL BIOLOGY, ANIMAL PHYSIOLOGY  
AND ADVANCED GENETICS - 18P2ZOP02**

(For those admitted in June 2018 and later)

Contact hours per week: 05

Contact hours per semester: 75

4 CREDITS  
SYLLABUS

## I: Developmental Biology

1. Staining and mounting of chick blastoderm of various stages.
2. Study of different types of placenta (Specimen).
3. Amphibian metamorphosis: Evaluation of Progressive and Retrogressive changes.

## II. Animal Physiology

4. Survey of digestive enzymes in cockroach
- 5 Determination of rate of salt loss in fish using salt loss & gain in fishes
- 6.Determination of Urea, Uric Acid, Ammonia and Creatine in the urine sample.

## III: Advanced Genetics

7. Schemes of Pedigree analysis
8. Drosophila culture techniques
9. Drosophila – observation of mutant wings and eyes.
10. Localization of Barr bodies, in the buccal smear.
11. Isolation of DNA Crude method.

## IV. Spotters.

Kymograph, Types of Placenta, Types of Egg, Human Sperm, Human Ovary, Pituitary Gland, Adrenal Gland, Adipose Tissue, Smooth Muscle, Striated Muscle, Karyotype.

<b>SL No</b>	<b>Course Outcome</b>	<b>Knowledge Level</b>
<b>CO1</b>	Determine the Staining and mounting of chick blastoderm of various stages.	<b>K1</b>
<b>CO2</b>	Analyze of digestive enzymes in cockroach	<b>K1</b>
<b>CO3</b>	Understand the method & culture of <i>Drosophila</i>	<b>K2</b>
<b>CO4</b>	Critically analyze and interpret the given spotters	<b>K1 &amp; K2</b>
<b>CO5</b>	Design experiments to solve research problems	

VIVEKANANDHA COLLEGE OF ARTS AND SCIENCES FOR WOMEN  
(AUTONOMOUS)

DEPARTMENT OF ZOOLOGY/M.Sc. DEGREE COURSE IN ZOOLOGY

SEMESTER-III

CORE PAPER: VIII

**ANIMAL BIOTECHNOLOGY - 18P3ZO08**

(For those admitted in June 2018 and later)

Contact hours per week: 06

Contact hours per semester: 90

5 CREDITS - SYLLABUS

**Course Objectives**

1. To acquire knowledge on technology used in living organisms
2. To learn the techniques in animal Cell cultures
3. To acquire knowledge about different animal breeding
4. To diagnose different diseases and their rectification techniques by using vaccines & drugs
5. To learn the ethics related to animal biotechnology

**UNIT I: GENETIC ENGINEERING**

Tools in Genetic Engineering-Enzymes, and Vectors- Plasmids, Cosmids and Phagemids. Methods of gene isolation, DNA sequencing Techniques, PCR – Types and applications, Gene transfer methods.

**UNIT II: ANIMAL CELL CULTURE**

Requirements in animal tissue culture laboratory instruments and media. Tissue culture, Organ culture - techniques, Advantages and applications, Detection of contaminants, Preservation and storage of cells, Animal tissue culture media, Safety consideration in laboratory cell culture.

**UNIT III: ARTIFICIAL ANIMAL BREEDING**

Artificial insemination, Transplantation, in-vitro fertilization (IVF), ICSI and embryo transfer. Production and use of transgenic animals, Biotechnology in Aquaculture- Gynogenesis, androgenesis. Transgenic fishes, Ethics of transgenic animals.

**UNIT IV: ANIMAL HEALTH AND BIOTECHNOLOGY**

Animal health - disease diagnosis, Monoclonal Antibodies - Prophylaxis - vaccines and its types, Antibiotic drugs and their sensitivity tests – Gene therapy.

**UNIT V: APPLICATIONS OF BIOTECHNOLOGY IN SOCIETY**

Bio fertilizers, Enzymes in detergents and leather industries, Biofuel- Biogas, bio ethanol, safety measures in biotechnology, Bioethics, Intellectual Property Rights and Patent.

**REFERENCE BOOKS:**

1. Satyanarayana, U. (2010) Biotechnology, Books and Allied Pvt Ltd. Kolkata.

4. Ranga, M.M. (2003) Animal Biotechnology, Agrobios Publishers, India,
5. Pradeep Parihar, (2004) A textbook of Biotechnology, Student Edition. Jodhpur.
6. Sasidhara, R. (2006) Animal Biotechnology, MJP Publishers. Chennai.

<b>SL No</b>	<b>Course Outcome</b>	<b>Knowledge Level</b>
<b>CO1</b>	Define the tools and its uses in genetic engineering	<b>K1</b>
<b>CO2</b>	Compare the type of cell and its culture technique	<b>K1</b>
<b>CO3</b>	Analyze the technique of artificial insemination	<b>K2</b>
<b>CO4</b>	Understand the disease diagnosis process in animals	<b>K1 &amp; K2</b>
<b>CO5</b>	Elucidate the Enzymes in detergents and leather industries	<b>K1</b>

VIVEKANANDHA COLLEGE OF ARTS AND SCIENCES FOR WOMEN  
(AUTONOMOUS)

DEPARTMENT OF ZOOLOGY/M.Sc. DEGREE COURSE IN ZOOLOGY

SEMESTER-III

CORE PAPER: IX

**GENERAL AND APPLIED ENTOMOLOGY - 18P3ZO09**

(For those admitted in June 2018 and later)

Contact hours per week: 06

Contact hours per semester: 90 hrs

5 CREDITS/ SYLLABUS

**Course Objectives**

- 1 To learn the taxonomical importance and classification of insects
- 2 To acquire knowledge about agricultural importance of insect pest
- 3 To identify the pests of stored products and medical importance of vectors
- 4 To learn different pest control measures

**UNIT I TAXONOMY OF INSECTS**

Classification of Class Insect - Key characters of insect, Economic importance of insects with example: Orders - Orthoptera, Hemiptera, Coleoptera, Diptera, Lepidoptera and Hymenoptera. Reasons for insects attaining pest status.

**UNIT II TYPES OF PEST IN AGRICULTURE**

Life cycles of any four pests of Paddy, Sugarcane, Cotton and Stored products –Nature of Damage and control measures, Life cycle of any two pests of cattle and poultry- control measures.

**UNIT III INSECT PEST OF STORED PRODUCTS**

Household insects and their control- Cockroach, Lepisma and carpet beetle- Insect vectors of human diseases: brief account on vector biology, pathogens involved, disease transmitted by mosquito and control measure, housefly and flea. Insect vectors of plant diseases- white fly and leaf hoppers.

**UNIT IV BENEFICIAL INSECTS**

Insect galls- NPV. Insects in medicine- Beneficial insects: predators- parasites- weed killers- soil builders- scavengers.

**UNIT V PEST MANAGEMENT**

Classification of insecticides based on the mode of entry, mode of action and chemical nature- merits and demerits of chemical methods of pest control, Pest resurgence. - Biological method of pest control, Integrated pest management (IPM)- precautions in handling pesticides- pesticide poisoning, first aid.

SEMESTER-III

CORE PAPER: X

**ENVIRONMENTAL BIOLOGY - 18P3ZO10**

(For those admitted in June 2018 and later)

Contact hours per week: 06

Contact hours per semester: 90 hrs

5 CREDITS/ SYLLABUS

**Course Objectives**

- ❖ To introduce the students to various concerns regarding the environment, regionally and globally including the natural challenges, pollution and their effects in the changing environment.

**UNIT I ECOSYSTEM**

Definition and concepts of ecosystem – Types of ecosystem (pond, forest, desert, cropland and estuarine ecosystem). Energy flow in ecosystem food chains, food webs and ecological pyramids.

**UNIT II BIODIVERSITY**

Definition of biodiversity, value of biodiversity, threats to biodiversity, endemic and endangered species of India. In-situ conservation – protected areas, National parks, wild life sanctuaries, conservation projects – tiger, elephant. Ex-situ conservation Zoological parks, Germ plasm banks, Biosphere reserves, National bureau of animal genetic resources.

**UNIT III POLLUTION**

Introduction -Types of pollution- Air, water, soil Pollution -effects and control measures. Biomagnification - eutrophication – Environmental Impact Assessment (EIA), bio indicators- bio remediation-bio degradation.

**UNIT IV NATURAL RESOURCES**

Resources – types, water resources management, Forest resources and chipko movement. Energy resources – renewable and non - renewable. Conventional and non – Conventional sources of energy.

**UNIT V ECOLOGICAL HABITATS**

Biomes, temperate deciduous forest, temperate grass land, savanna, tropical rain forest and desert, ecotone, estuary, concepts of ecological niche, types of ecological succession. Remote Sensing and GIS - introduction and applications

**REFERENCE BOOKS:**

(AUTONOMOUS)

DEPARTMENT OF ZOOLOGY/M.Sc. DEGREE COURSE IN ZOOLOGY  
SEMESTER-III CORE PAPER: X

**GENERAL AND APPLIED ENTOMOLOGY,  
ENVIRONMENTAL BIOLOGY AND ANIMAL BIOTECHNOLOGY  
(18P3ZOP03)**

(For those admitted in June 2018 and later)

Contact hours per week: 06

Contact hours per semester: 90 hrs

5 CREDITS/ SYLLABUS

**I. GENERAL AND APPLIED ENTOMOLOGY**

1. Preparation of key for the identification of insects using dichotomous Key.
2. Different types of Mouth parts of insects, their feeding habits (Diagram and description).
3. Study of insects: Beneficial and Harmful insects
4. Observation of important pests of paddy, sugar cane, cotton, pulses, vegetables, fruits and stored products to understand the life history of insects in relation to the life history of plants
5. Field study to understand the various methods of pest managements: (Observation in agro ecosystem).

**II. ENVIRONMENTAL BIOLOGY**

6. Estimation of dissolved O<sub>2</sub> in given water sample (Winkler's method).
7. Estimation of CO<sub>2</sub> content in given water sample.
8. Identification and description of fresh water plankton. (Daphnia, Cyclops, Volvox, Paramecium, Euglena).

**III. ANIMAL BIOTECHNOLOGY**

9. Single cell Protein culture – Demo.
10. Demonstration of southern Blotting and SDS PAGE techniques.
11. Tour reports of the visits to Biotechnological Research Lab / Industries.

**IV. RECORD SUBMISSION**

**REFERENCE BOOKS:**

1. David B.V. (Ed.), (1992) Pest Management and Pesticides: Indian Scenario, Namrutha Publications, Madras.
2. Hill D.S. (1987) Agricultural Insect Pests of Tropics and their Control, Cambridge University Press, UK.
3. Michael P. (1984) Ecological Methods for field and Laboratory Investigations, Tata Mc Graw Hill Publishing Company Ltd, New Delhi.
4. Nayar N.K. Ananthakrishnan T.N. and David B.V. (1983) General and Applied Entomology, Tata Mc Graw Hill Publishing Company, New Delhi.
5. Brown, T.A. (2006) Gene cloning -An Introduction, Stanley Thrones (Publishers) Ltd., Cheltenham, U.K.

<b>SL No</b>	<b>Course Outcome</b>	<b>Knowledge Level</b>
<b>CO1</b>	List the Preparation of key for the identification of insects	<b>K1</b>
<b>CO2</b>	Observation of important pests of paddy, sugar cane	<b>K1</b>
<b>CO3</b>	Analyses the water quality parameters with O <sub>2</sub> estimations.	<b>K2</b>
<b>CO4</b>	Demonstration of Blotting and SDS PAGE techniques	<b>K1 &amp; K2</b>
<b>CO5</b>	Understand the various methods of pest managements	<b>K1</b>

VIVEKANANDHA COLLEGE OF ARTS AND SCIENCES FOR WOMEN  
(AUTONOMOUS)

DEPARTMENT OF ZOOLOGY/M.Sc. DEGREE COURSE IN ZOOLOGY

SEMESTER-III

CORE PAPER: X

**EDC: SERICULTURE - 18P3ZOED01**

(For those admitted in June 2018 and later)

Contact hours per week: 06

Contact hours per semester: 90 hrs

5 CREDITS/ SYLLABUS

**UNIT I INTRODUCTION TO SERICULTURE**

History of Sericulture: Silk production, Scope and limitations of sericulture Industry- Life Cycle of Silkworm: *Bombyx mori* Morphology, stages and life cycle.

**UNIT II MULBERRY CULTIVATION**

Preparation of land for mulberry cultivation, Study of mulberry varieties- Methods of plantation and leaf production- Identification of mulberry diseases, pests and control measures.

**UNIT III SILKWORM REARING TECHNIQUES**

Grainage operations and activities. Silkworm rearing- Rearing environment condition-shoot harvest method of rearing- spacing and leaf requirement in different stages. Disinfection of rearing houses and appliances- handling of eggs- Transporting of eggs- hatching. –Brushing- young age and late age rearing- Spinning and mounting- Harvesting- transportation and marketing.

**UNIT IV DISEASES OF SILKWORM**

Silkworm diseases, symptoms and control measures: Protozoan disease-.Pebrine, Bacterial diseases- Flacherie, Viral diseases- Grasserie, Fungal diseases- Muscardine. Pest of Silkworm.

**UNIT V SILK PRODUCTION & BY PRODUCTS OF SERICULTURE**

Materials for reeling, stifling, cocoon cooking and brushing reeling- raw silk reeling- raw silk testing -classification of silk -By products of sericulture- Economic importance of silkworm- Economics of sericulture -a Role of women in Indian sericulture.

**REFERENCE BOOKS:**

1. Ganga G. and J. Sulochana Chetty (2005) An introduction to sericulture, 2<sup>nd</sup> Edition  
Vijay Primlani Publ. For Oxford and IBH Publ. Co. New Delhi.
2. Rangasamy, G. (1987) Manual on sericulture FAO, Vol. I-IV, Agriculture service bulletin, CSB, Bangalore, INDIA.
3. Dandin, S.B. (2004), Hand book of new sericulture technologies, Central Silk Board, Board, Bangalore, pp 287.

<b>SL No</b>	<b>Course Outcome</b>	<b>Knowledge Level</b>
<b>CO1</b>	Recognize the scope of Silkworm production	<b>K1</b>
<b>CO2</b>	Explain the nutritional values of Mulberry plant	<b>K1</b>
<b>CO3</b>	Apply the silk production process	<b>K2</b>
<b>CO4</b>	Identify the diseases and competitors in Sericulture industries	<b>K1 &amp; K2</b>
<b>CO5</b>	List the byproducts from sericulture process	<b>K1</b>

VIVEKANANDHA COLLEGE OF ARTS AND SCIENCES FOR WOMEN  
(AUTONOMOUS)

DEPARTMENT OF ZOOLOGY/M.Sc. DEGREE COURSE IN ZOOLOGY

SEMESTER-IV

CORE PAPER: XI

**BIostatISTICS AND RESEARCH METHODOLOGY - 18P4ZO11**

(For those admitted in June 2018 and later)

Contact hours per week: 06

Contact hours per semester: 90 hrs

5 CREDITS/ SYLLABUS

**Course Objectives**

- ❖ To learn the statistical concepts and uses in Bio / Zoology
- ❖ To identify the problem during the data analysis
- ❖ To provide a foundation and motivation for exposure to statistical ideas
- ❖ To inculcate the certainty that Statistics is important for scientific research
- ❖ To understand the compute and interpret of data

**BIostatISTICS**

**UNIT I IMPORTANCE OF STATISTICS**

Introduction, Concept and importance of statistics in biology: Collection of Data-Classification, Tabulation, Diagrammatic presentation and graphical presentation of Data

**UNIT II DESCRIPTIVE STATISTICS**

Measures of central tendency - Mean, Mode, Median: Measures of Dispersion- Standard Deviation, Standard Error and Coefficient of Variation. Probability and Theoretical Distribution- Binomial and Normal Distribution. Regression and Correlation analysis.

**UNIT III TEST OF FINDINGS**

T-tests (One sample t-test, Two sample t-test, Paired t-test), Chi-square test and goodness of fit, One-Way and Two Way ANOVA.

**RESEARCH METHODOLOGY**

**UNIT IV FORMAT OF THESIS**

Sources of literature collection. Format of thesis - framing the title. Preparation of the first page. Precautions to be taken while preparing introduction, Historical resume and materials and methods. Format of presenting results, including tables, figures and photographs. The art of writing discussion and summary. Guidelines to be followed while writing bibliography.

**UNIT V PAPER WRITING**

Preparation of Scientific paper for publication in a Journal. Internet and e-journals. Computer aided techniques for data analysis, data presentation and slide preparation.

**REFERENCE BOOKS:**

1. Gurumani, N. (2005) "An Introduction to Biostatistics", II Edition, MJP Publishers, Chennai .
2. Gurumani, N. (2009) "Research Methodology for Biological Sciences", MJP Publishers, Chennai.
3. Gupta, S.P., (2002) Statistical methods, Sultan Chand and Sons, Educational Publishers, New Delhi.
4. Memering, D. (2000) The prentice Hall Guide to research Writing. Prentice Hall International, London.
5. Khan, I.A., and Khanum, A., 2004 Fundamentals of Biostatistics, Ukaaz Publications, London.
6. Mahajan, B.K. (1997) Methods in Biostatistics for medical students and research workers, 6<sup>th</sup> edn. Jaypee Brother's Medical Publications Ltd., New Delhi.

<b>SL No</b>	<b>Course Outcome</b>	<b>Knowledge Level</b>
<b>CO1</b>	Recall the basic concepts of origin of life on earth	<b>K1</b>
<b>CO2</b>	Summarize the Measures of Central tendency	<b>K1</b>
<b>CO3</b>	Interpret the hypothesis with students t test	<b>K2</b>
<b>CO4</b>	Apply the knowledge of research methodology and frame the hypothesis	<b>K1 &amp; K2</b>
<b>CO5</b>	Understand the Preparation of Scientific paper for publication	<b>K1</b>

VIVEKANANDHA COLLEGE OF ARTS AND SCIENCES FOR WOMEN  
(AUTONOMOUS)

DEPARTMENT OF ZOOLOGY/M.Sc. DEGREE COURSE IN ZOOLOGY

SEMESTER-IV

CORE PAPER: XII

**EVOLUTION - 18P4ZO12**

(For those admitted in June 2018 and later)

Contact hours per week: 06

Contact hours per semester: 90 hrs

5 CREDITS/ SYLLABUS

**UNIT I EVIDENCES OF EVOLUTION**

Introduction, Origin of life – Abiogenesis, Biogenesis, Biochemical origin of life, experiments Urey miller's experiments. Evidences of evolution (morphology and comparative anatomy, Embryology, Physiological and Bio – chemical, Paleontological and Genetic.

**UNIT II PALEONTOLOGY & THEORIES OF EVOLUTION**

Geological time scale, Study of Fossils: Definition, Formation, Types and Determination of Age of Fossils. Evolution of Vertebrate groups, Ostracoderms- characteristics features and classification. Primitive jawed vertebrates- origin of jaws. Origin of amphibian, Reptiles, Birds and Mammals. Lamarckism - Neo Lamarckism, Darwinism – Neo Darwinism,

**UNIT III PROCESS OF EVOLUTION**

Mutation and their role in Evolution, Types of variation, Elemental forces of Evolution – mutation, Natural selection, Genetic drift, Recombination, Gene pool, gene frequency, Hardy Weinberg law and Evolution.

**UNIT IV ORIGIN OF ANIMALS**

Speciation, isolating mechanism, Neoteny, mimicry, coloration and its types, Adaptive radiation – Darwin's finches. Cultural evolution of man.

**UNIT V ANIMAL DISTRIBUTION**

Zoogeography distribution of Fauna and Flora – Oriental region, Australian region, Neotropical region, Ethiopian region, Neo arctic region and Paleoartic region. Insular fauna- Continental Island and Oceanic Islands.

**REFERENCE BOOKS:**

1. Richa Arora (2009) Patterns of Evolution, Anmol Publishers, New Delhi.
2. Richa Arora (2004) Elements of Evolution, Anmol Publishers, New Delhi.
3. Rastogi, V.B. (2003) Organic Evolution, Kedar Nath, Ram Nath.
4. Strickberger, M.W. (2000) Evolution. Jones & Bartlett Publications.
5. Dodson, E.V. (1960) Evolution process and product. East West Press, New Delhi.
6. Paulamos Moody (1978) Introduction to evolution. Kalyani Publishers, Ludhiana, New Delhi.
7. Kapoor, V.C. (1986). Theory and practice of animal taxonomy. Oxford & IBH Publishers Co., New Delhi.
8. Stebbins, G.L. (1969) The basis of Progressive Evolution, University of North Carolina Press,
9. Dobzhansky, T. (1955) Evolution, Genetics & Man. Wiley Eastern Pvt. Ltd.

<b>SL No</b>	<b>Course Outcome</b>	<b>Knowledge Level</b>
<b>CO1</b>	Recall the basic concepts of origin of life on earth	<b>K1</b>
<b>CO2</b>	Relate the evidences of Geological time scale and fossils	<b>K1</b>
<b>CO3</b>	Summarize the theories of evolution	<b>K2</b>
<b>CO4</b>	Discuss the role of speciation	<b>K1 &amp; K2</b>
<b>CO5</b>	Explain the Zoogeography distribution of Fauna and Flora	<b>K1</b>

VIVEKANANDHA COLLEGE OF ARTS AND SCIENCES FOR WOMEN  
(AUTONOMOUS)

DEPARTMENT OF ZOOLOGY/M.Sc. DEGREE COURSE IN ZOOLOGY  
SEMESTER-IV Elective Paper: IV

**FIRST AID AND HOME NURSING - 18P3ZOE04**

(For those admitted in June 2018 and later)

Contact hours per week: 06

Contact hours per semester: 90 hrs

5 CREDITS/ SYLLABUS

**UNIT I FIRST AID TREATMENTS**

Principles of first aid – Insect bite, Dog bite and Snake bite. Medical emergency. 108 and 112 service, First aid box and Laboratory first aid – Fire accidents, Corrosive chemicals.

**UNIT II BONE AND HEART**

Fracture - Causes, Types, Signs and Symptoms. First aid – Treatment. Effect of heat, heat stroke, signs and symptoms and first aid. First aid for wound, burns and strokes.

**UNIT III HOME REMEDY**

Home nursing – Definition, observation of patients, Conditions. Importance of habit observation. Clinical thermometer and its uses. Counting of pulse, Respiration, respiratory rate.

**UNIT IV STRESS MANAGEMENT**

Normal and abnormal blood pressure, Specific infectious diseases. Method of Nursing the patients suffering from illness..

**UNIT V HOSPITAL NURSING**

Care of sick – Routine nursing care of sick. General application of heat – Hot baths and hot sponging, warm baths and medicated baths. General application of cold bath and sponging.

**REFERENCE BOOKS:**

1. Park. K. (2011) Text book of preventive and social medicine (21<sup>st</sup> edn.). M/s Banarsidas Bhanot Publishers, Jabalpur.
2. Indrani., T.K. (2006) First Aid for Nurses (1<sup>st</sup> edn.), Jaypee Brothers, Medical Publishers (P) Ltd. New Delhi.
3. Shukla, G.S. and Upadhyay, V.B. (2005) Economic Zoology, Rastogi Publication, Meerut.
4. Park. K (2004) Essentials of community health nursing (4<sup>th</sup> edn.) M/s Banarsidas Bhanot Publishers, Jabalpur.

SL No	Course Outcome	Knowledge Level
CO1	Recall the basic steps for the first aid process	K1
CO2	Understand Fracture - Causes, Types, Signs and Symptoms.	K1
CO3	Summarize the home nursing procedure	K2
CO4	Discuss the blood pressure	K1 & K2
CO5	Explain the Routine nursing care of sick	K1

VIVEKANANDHA COLLEGE OF ARTS AND SCIENCES FOR WOMEN  
(AUTONOMOUS)

DEPARTMENT OF ZOOLOGY/M.Sc. DEGREE COURSE IN ZOOLOGY  
SEMESTER-IV

**PROJECT AND VIVA VOCE - 18P4ZOPR01**

(For those admitted in June 2018 and later)

Contact hours per week: 12

Contact hours per semester: 180 hrs

5 CREDITS/ SYLLABUS

Rules Governing the Evaluation of Project and Viva-Voce

1. Each student shall select a topic for his/her Project work in consultation with his/her guide and the Head of the department.
2. The Project report should be submitted to the Controller of Examinations (PG Courses) through the Head of the Department one week prior to the commencement of the terminal Examinations. If a candidate fails to submit the project report within the stipulated time, he/she may be permitted to submit the same one day prior to date of *viva voce* examinations with late fee prescribed by the Principal. If the candidate fails to submit the project report one day prior to the date of *viva voce* examination, he/she may be permitted to submit the Project report within a period of one month from the date of conduct of *viva voce*, with extension fee prescribed by the Principal. If the candidate fails to submit the project report even after that extension period, he/she will be treated with on par with failures and he/she has to do another project and to submit the report after six months by paying fee prescribed by the Principal.
3. Each student shall submit 2 copies of his/her Project report for valuation.
4. The Project report shall contain a minimum of 25 pages excluding bibliography and appendices.
5. The Project report shall be valued for a total of 80 marks out of which the external examiner and the Guide share 20 marks each. The sum of marks awarded by both the examiners shall be considered to be the final mark. For a pass in the Project report, the student should secure a minimum of 36 marks. If a student fails to get the minimum pass mark in the Project report, he/she shall be permitted to resubmit his / her Project report once again within a period of 6 months from the date of publication of the result.
6. For those candidates who have passed in the evaluation of Project report, there will be a *viva voce* examination on the above. The *viva voce* carries a maximum of 20 marks and the guide and the external examiner will conduct it jointly. The student should secure a minimum of 10 marks for a pass in the *viva voce* examination, failing which he/she shall be required to reappear for the *viva voce* after a month from the date of *viva voce* already conducted but within a period of 3 months for which he/she will have to pay a fee as prescribed by the Principal.
7. For a pass in this paper as a whole, a student should secure a minimum of 50 marks in Project report and *viva voce* put together.

**QUESTION PAPER PATTERN FOR THEORY**

Time: 3 Hours

Maximum Marks: 75

Each question paper consists of 3 parts – A, B &amp; C

**PART - A (20 x 1 = 20 Marks)**

Choose the Best Answer

Four Questions from each Unit

**Part - B (5 X 5 = 25 Marks)**

Answer All questions (Either or type)

Two questions from each unit.

**PART - C (3 x 10 = 30 Marks)**

Answer any three questions (Open Choice)

One questions from each unit.

**QUESTION PAPER PATTERN FOR PRACTICALS**

Time: 4 hours

Maximum Marks: 60

- I. Major practical -20 Marks
- II. Minor practical -10 Marks
- III. Spotters (4 X 5)- 20 Marks
- IV. Record - 10 Marks
